What is 80/20?

About 80/20

First and foremost, I'm sure you're wondering "What is 80/20?" Who are we, what do we sell, and what's our value? Simply stated, 80/20 is a T-slot aluminum construction system you can use to build virtually anything.

When you think of 80/20 think of an "erector set" for adults. You mix, match, assemble and reassemble our products to create your customized solution or innovation.

80/20 provides a one-stop shop for our customers. You will find 80/20 being used everywhere including industrial, commercial, do-it-yourself and other markets and applications. We offer several services such as technical design assistance, custom machining, assembly services, and an in-house custom panel shop. 80/20 ensures that our customers can expect a high-quality product each and every time.

Why the Name 80/20?

In business, the 80/20 theory is a powerful tool. This theory is called Pareto's Law after Vilfredo Pareto (1843-1923), an Italian economist and sociologist who said that 80% of your results come from 20% of your efforts. We run our organization based upon this theory and everyone shares in the advantages.

80/20 Mission

Empower and encourage the designer and builder in all of us through:

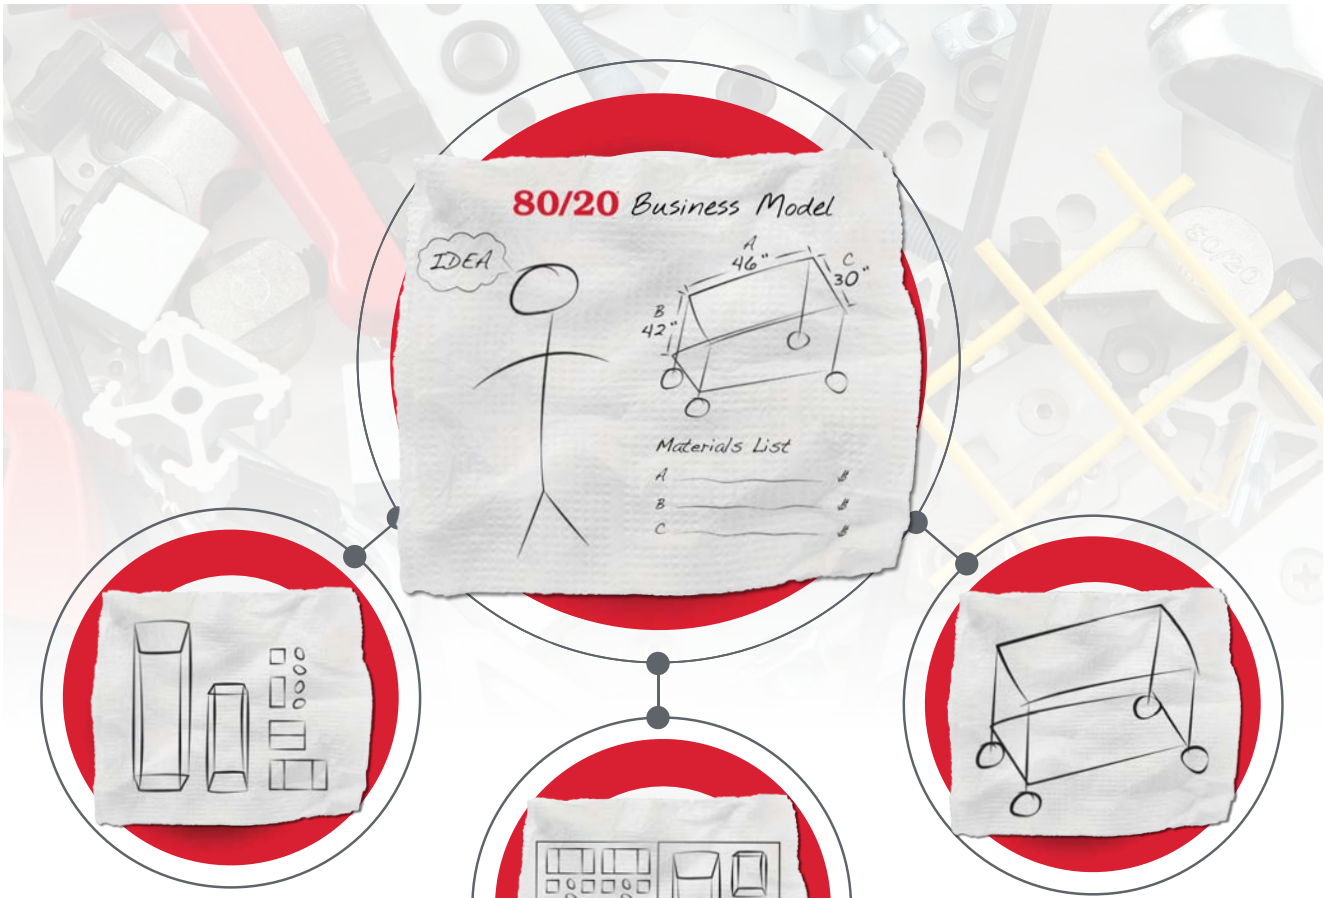
- Cultivating and Supporting Creative Innovators
- Community Engagement
- Operational Excellence
- World-Class Customer Experience

80/20 Vision

Relentless pursuit to provide innovative modular building systems that inspire custom solutions.

We strive to develop and facilitate our building systems to construct virtually anything to be used virtually anywhere, while at the same time creating ways to share great ideas that encompass the limitless power of the human creative spirit.

Business Model



Parts & Pieces

Materials shipped as parts and pieces ready for full assembly.

Kit Form

Materials packaged as a kit(s) and ready for easy assembly.

80/20 Builds

One-Stop-Shop

80/20 One-Stop-Shopping means you get convenient and efficient products and solutions, as well as the services to augment your order, all in one place. Save the time, hassle, and headache that come from working with multiple vendors.

Our commitment to being your one-stop-shop means that we have no minimum orders; we want ALL of your business. We know that your project is unique and that you need the flexibility to order in small or large quantities.

It also means we listen to your needs and continually add to our stock of products. We already have the largest product offering in the industry and it's only going to continue to grow! Our products are customer-driven and always expanding. And if it's something we don't currently carry, we'll source it for you.

In order to make your 80/20 experience simple and straightforward we have in-house capabilities to support our dedication to being your one-stop-shop. These are top-of-the-line machine shops and services that produce at the same level of quality you can expect with anything 80/20. These valuable resources are at your disposal to streamline your processes and save you time.

Call an 80/20 Design Technician today at 260-248-8030

The 80/20 Difference

We know how frustrating it is when that order you placed arrives damaged, with incorrect parts, or in poor quality. At 80/20 we set high standards for each and every process to make sure you never experience this disappointment with any 80/20 shipment.

At 80/20 we go the extra mile to ensure you get the product you want how you want it. We adhere to rigorous quality checks throughout the entire product lifecycle. This 80/20 difference means that on every order, your parts will be cleaned, and individually packed by type. Hardware and parts will be clearly labeled and packaged with appropriate measures for safe transit.

For orders that you need segmented into kits or bundles, that's not a problem. Receiving your shipment in kit form is especially useful for instances where you have multiple quantities of the same project, allowing for easy organization and setup.

If you are ordering large quantities, our bundling service packages similar products together. For instance, all of your bars will be packed together and all of your panels packed together. As with all orders, they will be clearly labeled. Bundled orders typically have lower freight costs due to their consolidated nature.

When you have an order with specific packing requirements, we can accommodate.

Visit our Custom Packaging page (pg. 1-27) for more information.

What is 80/20?

Ongoing Support

Your 80/20 support doesn't end when you receive your order. If you have questions or need assembly advice or suggestions, we've got you covered. Our dedication to providing you quality products and services is all-inclusive; we want to partner with you on your entire solution.

On the off chance that your order isn't exactly what you expected, we'll make your return simple and painless and expedite the fulfillment of a replacement. Visit our return policy on page 1-29 and you can always speak to a representative to work through the process with you.

Customer Support

It's important that you get the information, assistance and answers you need when you need them. You don't want to spend time navigating through a stream of prompts or being passed from one person to another.

At 80/20 our phone is answered by a live person who will quickly direct you to the right person. Our hours of operation are from 7:00 a.m. to 5:30 p.m. ET and if you need after-hours assistance we have personnel available.

If you prefer the convenience of online assistance we offer live chat sessions to accommodate your schedule and provide interactive support. You can expect prompt responses and useful information.

From product questions to order tracking or design assistance, we have an extensive network of support specialists ready to help through a variety of communication channels. Whether you prefer email, phone, or live chats, you'll work with knowledgeable and experienced personnel to get the dedicated attention and information you need in a quick, concise manner.

Contact a Representative today for product information, design assistance, order tracking, or any other questions you may have.

Local Distributor Network

80/20 has an extensive network of local distributors to serve your full cycle needs. These specialists provide a range of services from on-site demonstrations and evaluations to after-order assistance.

Your local distributor is there for you throughout every stage of the 80/20 experience. Even before you begin designing your solution, technicians can visit your business to provide a review of your equipment and processes. You'll find that distributors have "80/20 eyes." They can see places and procedures where 80/20 products and services will help speed up product lifecycles, cut your costs, or create synergies.

Local distributors are also available for recommendations on integrating 80/20 with your current equipment and resources. 80/20 partners with distributors focused on a robust line card able to serve a diverse industry base and accommodate your total-project requirements.

Online Assistance

Distributor Lookup

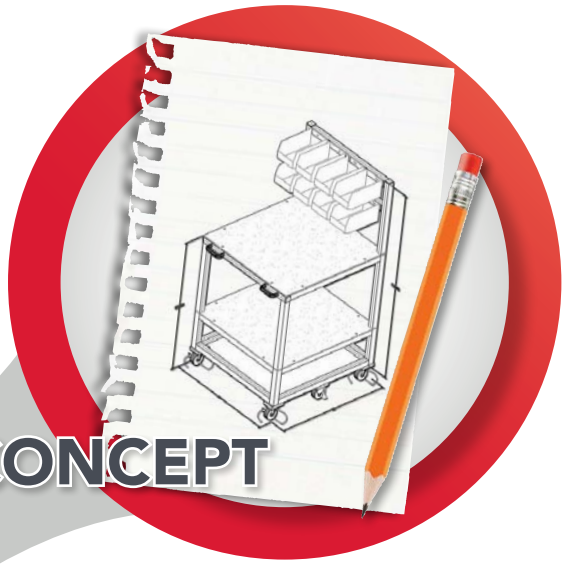
Use the Distributor Lookup tool to find your local 80/20 partner. Use the QR code to visit the lookup.

Design Assistance

From Concept to Completion

We have highly skilled design technicians on-staff to provide you a custom quote and offer optimization recommendations. These experienced technicians will see your solution through from idea to production. We'll help you save costs by finding the best, most economical option to get the job done.

Our technicians have a great eye for detail and take the time to review your design for accuracy. We'll work with you to address your requirements.



Local Assistance

Our local distributors are also available through an extensive network for added support. 80/20 distributors are the most knowledgeable and experienced in the industry.

No Project Too Big or Too Small

There are no size limits on what we will quote. No design is too big or too small; we appreciate all of your business and want to work with you on any project.

Online Design Assistance Tool

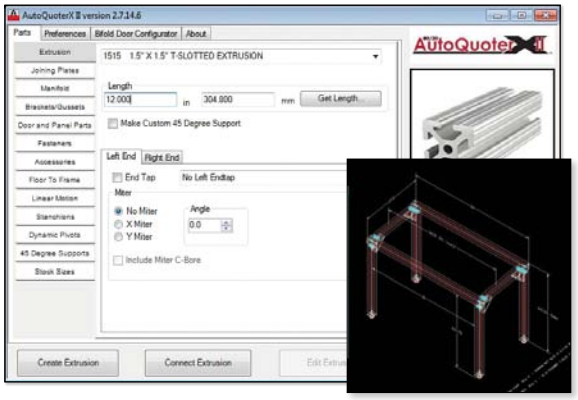
Our online tool makes it fast and straight-forward to submit your request for design assistance. Simply fill out the preliminary design sheet and, if applicable, upload your drawing(s).

For additional details or to use the Online Design Assistance Tool visit our website at www.8020.net.

What is 80/20?

Free Design Tools

80/20 offers several free tools, libraries, and drawing files to make it easy for you to design and enhance your 80/20 project. This variety of resources also make it simple for you to integrate 80/20 products into existing designs. Be sure to check out our YouTube site for helpful hints as well as tips and tricks videos.

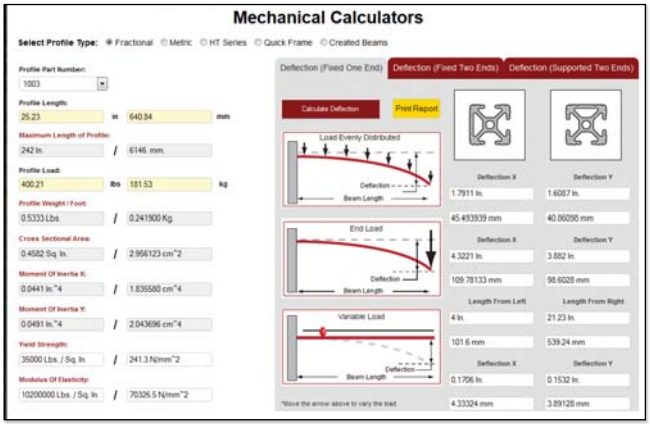


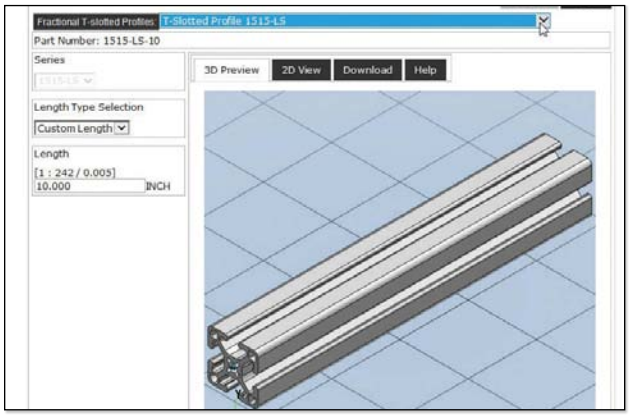
80/20 AutoQuoterX® II

AutoQuoterX® II is used in conjunction with versions of AutoCAD® software for optimum design capabilities. It is free and can be downloaded from our website. This plugin features an easy-to-use interface to streamline the design process and generate a detailed bill of materials. We are continually updating and enhancing AutoQuoterX® II tools and resources.

80/20® Tech Toolkit™

Tech Toolkit™ offers bundled design tools to provide guidance and speed up design time. These tools will help specify the profiles that work best for your application. Use the built-in conversion calculator to cross-reference calculations. There is also an online deflection calculator at 8020.net for beam deflection, as well as a miter cut worksheet to assist in creating drawings, analyzing real-life limits, and more.





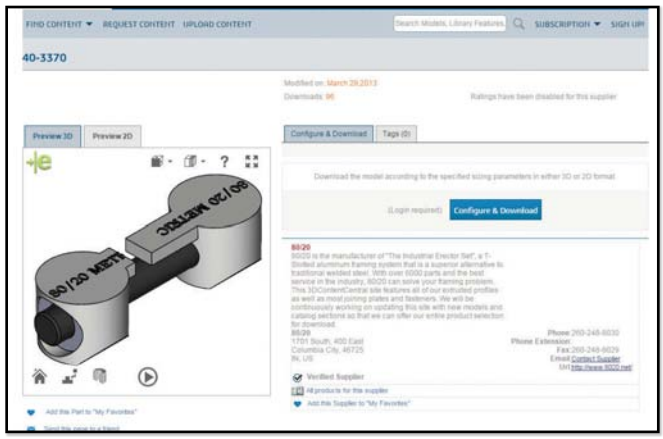
80/20 PART SOURCE™
CAD File Library Powered By PARTsolutions®

80/20's PartSource® is a CAD library powered by PARTSolutions® and is accessible directly from our website. It includes design files for parts and profiles. Products are available in both 2D and 3D file types, supporting a variety of CAD packages. Users of Inventor® also have the added benefit of a direct link to PARTSolutions®. These design files are also available at 8020.net on each product page.

Free Design Tools

SolidWorks® 2012 - Dynamic Library

The 80/20 SolidWorks® Dynamic Library is a free single download of thousands of parts, including profiles, fasteners and accessories, as well as profile weldments. This simple download makes it easier for you to design, test, and experiment with your builds. We are continually adding drawing files, so be sure to check for updates at 8020.net.



3D Content Central® provides easy to find 2D and 3D file types for 80/20 profiles, fasteners and accessories. The files support a wide range of CAD packages. Users of SolidWorks® have the added benefit of a direct link to 3D Content Central.

CAD DIRECT

Free Streamlined Files

80/20 offers free streamlined files for T-slot, Ready Tube® and Quick Frame® profiles. Each profile series is downloadable in its own convenient file. The files are available in:

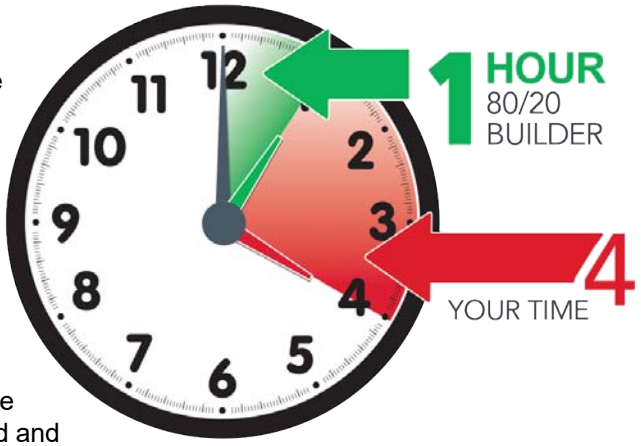
- **AutoCAD® - DXF – 2D**
- **SolidWorks® 2013 – SLDPRT**
- **Inventor® - IPT File Format**
- **SketchUp – SKP File Format**

Visit 8020.net to use all of 80/20's design tools!

What is 80/20?

80/20 BUILDS

Time is critical in today's fast-paced world. 80/20 Builds assembly service gives you more time to focus on what you do best. We'll take your project from the design stage all the way through to completion, including the actual assembly.



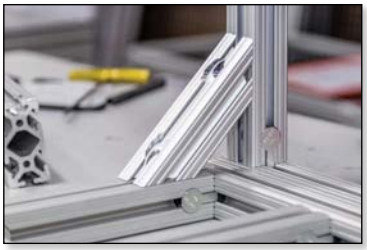
It stands to reason that, on average, we can assemble your project in about a quarter of the time it takes someone who doesn't build with 80/20 day in and day out. Consider all the other projects and tasks that can be done in that time!

The 80/20 Builds service was created to help you increase your productivity. We have a team comprised of dedicated and experienced technicians who optimize designs, build projects and ship them safely and damage-free.

PRELOADING

We prep your fasteners and plates with the required hardware for quick installation.

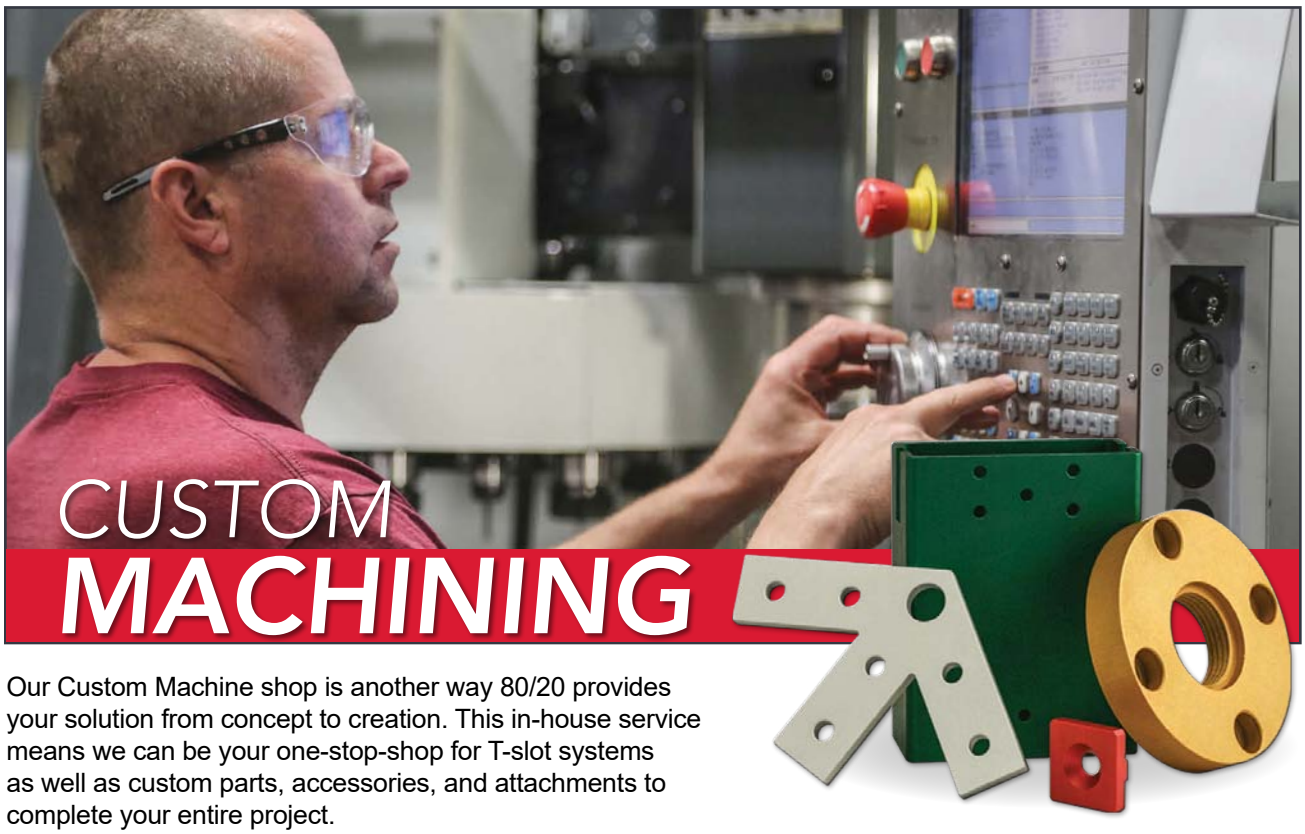
SUBASSEMBLY



We build your project into segments that can be easily and quickly assembled later.

FULL ASSEMBLY

Your project is completely built, shipped, and ready to use when it arrives at your door.



CUSTOM MACHINING

Our Custom Machine shop is another way 80/20 provides your solution from concept to creation. This in-house service means we can be your one-stop-shop for T-slot systems as well as custom parts, accessories, and attachments to complete your entire project.

Our precision in-house Custom Machine shop quickly makes adjustments or changes to any part in our catalog, saving you the headache involved in outsourcing these services. We can also make an entirely new piece completely customized for your needs. And if it's not a material we carry, we'll source it for you.

VAST STOCK OF PARTS

We offer over 200 in-stock structural shapes; 80/20 will make the custom bracket or mount you need to augment your order. Don't waste time and energy working with multiple vendors. We have the materials, personnel and equipment to provide your products with a quick turnaround and the high level of quality that comes with all 80/20 products and services.

NO PART TOO BIG OR TOO SMALL

We specialize in custom-machining aluminum; there are no minimum charges and no minimum runs. Our state-of-the-art equipment is set up for single parts or large quantities, all to the tightest of tolerances.

Contact a design technician today at 260.248.8030 for assistance with your Custom Machining project.

What is 80/20?

PANEL SHOP

80/20's in-house Panel Machine Shop is a service that provides you the total solution for your project needs. We stock a selection of over 100 varieties of plastic panels, aluminum plates, and wire mesh with thicknesses ranging up to half an inch. This huge supply means you won't have to wait on material or the machining; we do it all in one location.

We machine our panels in-house, saving you valuable time and money; you'll get your project fast and to your exact requirements.

We have the equipment to take your design and create the custom shape, access point, door, or barrier your project may require. The results of this extensive in-house shop are finalized materials that are seamlessly incorporated into your application.

This is accomplished at the high level of quality we hold ourselves accountable to in all of our products and services. From the initial design stages through our hand-packing procedures, you'll receive your panel just as you ordered it and expect it – to your specifications and damage free.

PANEL SHOP MACHINING

- Cut to Size

METAL FINISHING

Our in-house metal finishing capability is one of the several ways 80/20 is committed to being your one-stop-shop for T-slot projects. This service encompasses a range of options to provide you with fast turn times and consistent, high-quality, products.

Our standard finishing process here at 80/20 begins with the raw aluminum product; we machine the part, vibratory finish and/or sand it (depending on the item), and then move it into the anodize finishing process. It's worth noting that 80/20 is one of the only T-slot providers in the industry with in-house anodizing capabilities.

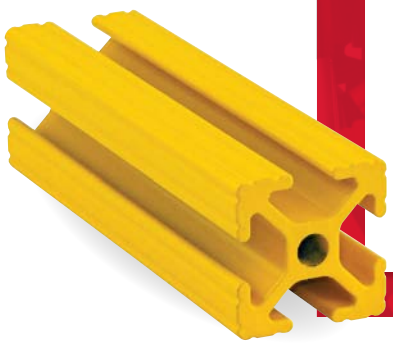
FINISHING OPTIONS

- Mill
- Anodize
- Blasted
- Chromate
- Zinc Plating
- Powder Coat
- Electroplating

ALTERNATIVE PRODUCT FINISHES

We have invested in the resources to provide a high-quality product in a timely manner. Our metal finishing shop consists of dedicated personnel, equipment and space.

And we know that there are times you need an alternative finish for your product. Talk to a technician today; we also offer a range of special finishes from powder coating to electroplating and beyond.



What is 80/20?

STANDARD MACHINING

80/20 has a wide range of standard machining services. These are cuts, drills and bores we make hundreds of times a day to your precise specifications. We have invested in top-of-the-line equipment and personnel to create a streamlined process for machining your products fast and accurately.

We have this down to a science; our large selection of standard machining services applies to all of our profiles, fasteners and accessories. We even have panel, wire mesh, and aluminum plate machining capabilities. This means high-quality, accurate products coupled with fast turn times.

DID YOU KNOW?

80/20 has over 500 standard machining services available to provide fast turn times.

CAPABILITIES FOR ALL SIZES

If you need one or one hundred parts machined, we have the capabilities to accommodate. Our equipment ensures precise cuts and drills so you receive your order just as you designed it. What's more, each part is visually inspected and measured for proper location and sizing of machining services. *(image of counterbore machining service to right)*

CUSTOM PACKAGING

When you need something beyond 80/20's standard packing for your order, we offer a custom packaging service. This service accommodates your more detailed and specific requirements. From bubble wrapping each profile, using unmarked boxes or labeling parts per your special instructions, we will work with you to fulfill your packing needs.

FOR YOUR SPECIFIC NEEDS

A popular option is our part-tagging service. This is ideal for orders with several bars of varying lengths or different machining services, or for large quantities that you need labeled alphanumerically to match the bill of materials. The parts will be separated and packaged together by type and the labels will be clear and easy to read.

As with all 80/20 orders, our packing is to the highest of standards. No matter the unique details of your requirements, your shipment will be properly hand-packaged to ensure a damage-free delivery.

POPULAR CUSTOM PACKAGE OPTIONS

- Part-Tagging
- Bubble Wrapping
- Individual Part Packing
- Unmarked Boxes
- Kit Packaging
- Bar Coding

What is 80/20?

Shipping Information

Our standard shipping time is the best in the T-slotted profile business.

Consider the following when deciding whether to buy pre-cut or full length profiles:

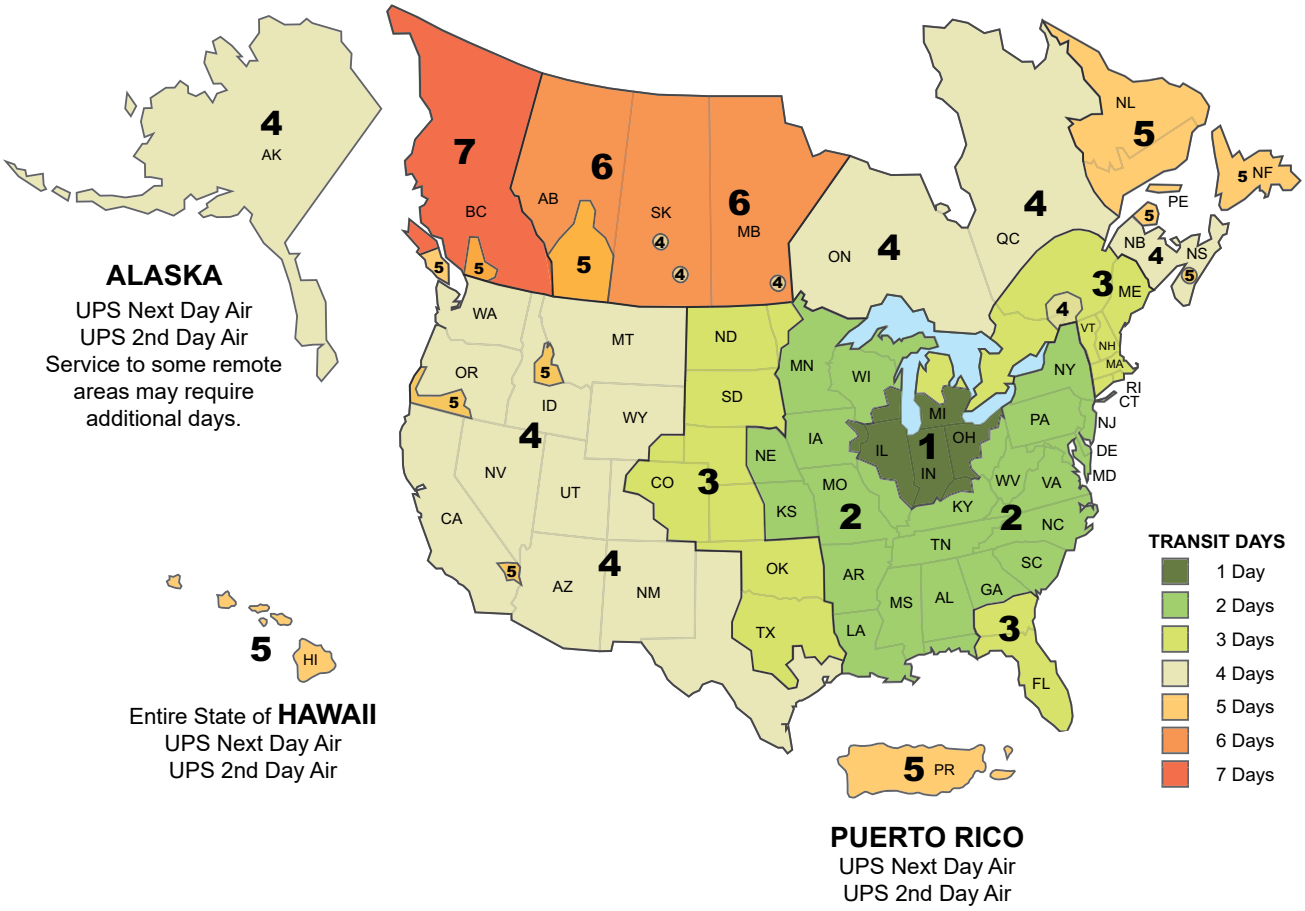
- **Freight costs and delivery schedules**
  Packages longer than 95" must ship via commercial carrier. Any package 95" or shorter can ship via UPS, which is usually substantially less expensive and has faster delivery schedules than commercial trucking.
- **Quality cuts and accurate lengths**
  When you purchase pre-cut profiles, you can expect to receive quality cuts and accurate lengths, washed and packed for shipping.
- **80/20® is centrally located for convenient UPS delivery from coast to coast**

Shipping Rate Information:

Most carrier rates are calculated based on weight and package dimensions. However, most trailers reach their volume capacity before their weight limit, the important factor is the density of the shipment. Standard rate classifications for 80/20® packaged profiles and panels start at rate class 60. This classification will vary due to the density of the shipment.

Aluminum Profile:
Freight Rate Classification: ≥ 60
Bill of Lading Description: aluminum profiles and parts

Plastic Panels:
Freight Rate Classification: ≥ 85
Bill of Lading Description: laminates in sheets



Shipping Information

You need communication, commitment and timely delivery of your orders. Superior quality, customer service, and fast shipping are the foundation of our business so we will always strive to ship your orders in less than our published timeframes. Your order is ready for processing once all drawings, worksheets and payment have been completed. **To see the latest shipping schedule, visit www.8020.net/shipping-information.**

Please note: All orders including 80/20 Builds services, custom machining or total $10,000 or more will have a scheduled lead time. All orders including non-stock black anodizes profiles or parts will have additional processing days added on top of the current in-house processing days.

Preferred Carriers

To ensure timely and safe delivery of your products 80/20 works with preferred carriers. They make daily scheduled pick-ups. If you have a transportation company you prefer to use and they are not on this list, we will work with you to accommodate.

Less-Than-Truckload (LTL) Carriers:		*Parcel Carriers:*
• TForce Freight	• YRC Freight	• UPS Ground
• Conway (XPO)	• ABF Freight	• FedEx Ground
• Old Dominion	• FedEx Freight	• FedEx Express

Damaged or Lost Shipments

UPS and Prepaid Truck Shipments:
Check your order immediately upon receipt. All damages must be noted on the packing slip and bill of lading. All shipping discrepancies must be reported to 80/20 LLC within 14 days of receipt of your order. Keep all damaged goods for inspection.

Truck or Expedited Freight (when you select the carrier):
Check your order immediately upon receipt. All damages must be noted on the packing slip and bill of lading. All shipping damages, discrepancies and shortages must be reported to the carrier you selected within 7 days of receipt of your order. Keep all damaged containers and goods for your carrier to inspect. File your claim with your carrier for the damages at that time.

Return Policy

Our guarantee is to provide you with the best customer support possible. If you are not completely satisfied with your recent purchase, we are here to assist you with your return. Any returns submitted after the 30 days is subject to a restocking fee. Additionally, returns are not accepted after 60 days from the date of receiving your products.

For our complete return policy process visit 8020.net/returns or scan the QR code.

What is 80/20?

Terms and Conditions of Sale

1. ORDER PLACEMENT. All goods and services furnished by 80/20, LLC ("80/20") are provided pursuant to these Terms and Conditions ("Terms and Conditions") whether provided following an order placed electronically, verbally, or on paper, whether the order is placed directly through 80/20 or through an 80/20 representative, and whether the order is placed following Buyer's review of 80/20's catalog or website, or following receipt of a Quotation only, or following the exchange of other documents (the catalog website Quotation and all other documents, hereafter, jointly, the "Quotation"). Acceptance by 80/20 of Buyer's order is expressly conditioned upon Buyer's acceptance of these Terms and Conditions, including those on the face of the Quotation, and any provisions of Buyer's order in conflict with these Terms and Conditions are expressly rejected. Buyer acknowledges that no representation or warranty other than those contained in this document have been made or relied upon. No additions or modifications shall be valid unless confirmed in writing by 80/20. 80/20 IS NOT BOUND TO FURNISH ITS GOODS OR SERVICES EXCEPT IN ACCORDANCE WITH THESE TERMS AND CONDITIONS.

2. PRICE/DELIVERY/DELAY. Prices for goods shall be those in effect on the date of invoice unless otherwise provided by the Quotation or agreed to in writing by 80/20. Unless otherwise provided on the face of the Quotation or agreed by 80/20 in writing, price and delivery terms shall be F.O.B. shipping point. Unless otherwise agreed in writing, 80/20 will select the route and manner of shipment, reserves the right to make delivery in installments when necessary, to invoice each installment separately, and to expect payment for each installment within 80/20's selling terms. All risks of loss or damage shall pass to Buyer at the place and time such goods are placed into the possession of the carrier or shipper, in accordance with the previously referenced F.O.B. shipping point term. Buyer shall be responsible for obtaining and paying for insurance to cover any loss to Buyer. Buyer shall pay 80/20 for the contract price in the event of loss of the goods. If Buyer fails to accept delivery according to the agreed upon delivery schedule, 80/20 may cancel the then remaining balance of the order. Such cancellation, if elected by 80/20, shall be in addition to, and not in lieu of, any other rights or remedies which 80/20 may have at law or equity. Prices are good for only quantities indicated. If shipment or any other act or condition affecting payment for the goods or any part of them shall be delayed on account of Buyer, payment shall be due as if shipment had been made, a reasonable storage charge may be made, and such storage shall be at the risk of Buyer. 80/20 shall not be liable for any direct, indirect, consequential, special, or incidental losses or damages to Buyer or to any third parties resulting from 80/20's delay in shipment regardless of cause, including but not limited to those causes set forth in the Force Majeure section of this document.

3. PRODUCT VARIANCE FROM PHOTOS. 80/20 attempts to provide accurate photographs of the products it offers for sale, but there may be some variation between the photographs and the actual products. Buyer may return any product if the variance is unacceptable to Buyer. Buyer must submit its request for return based on the product variation within thirty (30) days after receipt of the goods.

4. ACCEPTANCE. Goods furnished or services performed by 80/20 will be deemed to have been finally accepted thirty (30) days after receipt by Buyer, unless rightfully rejected within such period by written notice to 80/20, setting forth all of the defects upon which the rejection is claimed. Claims for factory damage or shortages shall not be considered unless made in writing within thirty (30) days after receipt of the goods or services and accompanied by reference to our bill of lading and invoice numbers. Buyer's claims for damage or shortage in transit must be filed by Buyer against carrier. Defective goods shall be held for 80/20's inspection or disposition. Buyer must note damaged goods or the appearance of probable damage with the freight carrier and on the relevant freight documents at the time of receipt.

5. 80/20 PROPERTY. All photographs, samples, descriptions, drawings or intellectual property provided by 80/20 to Buyer shall remain the property of 80/20 and shall only be used by Buyer to market 80/20 products to third parties. Buyer shall include in any materials incorporating 80/20 intellectual property, all copyright and trademark notices provided by 80/20. All such property shall be returned to 80/20 upon demand and any license created hereunder, implied or otherwise, is terminable at will by 80/20 and is hereby expressly terminated pursuant to Section 18 upon termination of this agreement.

6. RETURN POLICY. Buyer shall have no right to return any goods furnished by 80/20. 80/20 may, in its sole discretion, authorize Buyer to return goods. 80/20 may authorize the return of goods without charging a restocking charge, but in most cases, 80/20 will only authorize the return of goods subject to a restocking charge, the amount of which will depend on the type of goods being returned. The restocking charge shall be deducted from the amount refunded to Buyer.

7. TAXES. Prices do not include any federal, state or local taxes. Any applicable excise, import, sales, use or similar taxes, whether federal, state, provincial or local, and any transportation and other charges shall be the responsibility of and be paid by Buyer and, if paid by 80/20, Buyer agrees to reimburse 80/20 for any such payment and further agrees that 80/20 may add any such payments to the purchase price of the goods.

8. PAYMENT/CREDIT/SECURITY. Payment shall be due prior to shipment unless adequate credit remains on an account in good standing. All orders received are subject to credit approval. Buyer agrees to submit from time to time to 80/20 those items reasonably requested in order to establish or update Buyer's credit. 80/20 shall be entitled to charge interest on past due accounts at a rate of 1.5% per month (18% annually). Whenever 80/20, in good faith deems itself insecure, it may, without prejudice or waiving any other rights or remedies it may have at law or equity, cancel any outstanding orders with Buyer and/or hold production/shipment of any unfilled orders; modify or revoke its extension of credit to Buyer; and take any other steps permitted by law and necessary or desirable to secure 80/20 with respect to Buyer's payment of goods and services furnished or to be furnished. Buyer will pay 80/20's actual costs of collection, including but not limited to court costs, litigation expenses, and reasonable attorney's fees, incurred for collection of any delinquency. Title to the goods shall remain with 80/20 until Buyer receives physical possession of the goods and the goods are fully paid for by the Buyer. Buyer shall have no right of offset against amounts owed to 80/20.

9. QUALITY POLICY. 80/20 is dedicated to providing its products free of actual defects in material and workmanship. 80/20 will replace or repair, at 80/20's option, any product which, upon 80/20's inspection is found to have a defect in material and/or workmanship provided such defect is reported to 80/20 in writing within one (1) year of the date of the shipment from 80/20's factory ("Quality Policy"). 80/20 in no event shall be liable for indirect or consequential damages arising out of the use of 80/20 products. Components purchased by 80/20 from others for inclusion by 80/20 shall be warranted only to the extent of the guarantee or warranty, if any, made by the supplier of said component. No warranty is made by 80/20, express or implied, that 80/20 products as used in a customer's design and specifications are fit for that customer's specific purpose. Services performed by 80/20 will be conducted in a manner consistent with that level of care and skill ordinarily exercised by members of the industry currently practicing under similar conditions. As an independent contractor of Buyer, 80/20 will provide evaluation, advice, and guidance to Buyer, but Buyer recognizes that 80/20 is a technical contractor and not a professional consultant.

APART FROM THE ABOVE QUALITY POLICY, THERE ARE NO WARRANTIES, EXPRESS, IMPLIED, OR STATUTORY, INCLUDING, WITHOUT LIMITATION, WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WHICH EXTEND BEYOND THE DESCRIPTION ON THE FACE HEREOF.

80/20 expressly reserves the right to substitute materials in the products described in the catalogs and any supplements thereto; however, this shall not apply to special order products and/or custom products where 80/20 is advised in writing of specific material requirements and agrees in writing to comply with the requests for such specific materials. Any and all warranties shall be construed and enforced under the Laws of the State of Indiana.

10. INDEMNIFICATION. Buyer shall defend, indemnify and hold 80/20 harmless from and against any and all claims, liabilities, loss, costs, damage or expense (including reasonable attorneys' fees) of any kind or nature whatsoever relating to the performance by 80/20 hereunder, including without limitation, claims made for property damage or personal injury (including death), whether such claims are premised on contract or on tort (including, without limitation, strict liability). This indemnity provision shall not apply where such damage or injury is attributable solely to the negligence of 80/20, its employees or agents.

11. FORCE MAJEURE. 80/20 will not be liable for any delay in the performance of its obligation under this Quotation or for any damages suffered by the Buyer by reason of such delay, when such delay is directly or indirectly caused by or in any manner arises from: fires; floods; accidents; riots; acts of God; governmental interference; embargoes; strikes; labor difficulties; shortages of labor, fuel, power, materials or supplies; transportation delays; any existing or future laws or acts of the Federal or any State government (including specifically, but not exclusively, any orders, rules or regulations issued by any official or agency or any such government) affecting the conduct of 80/20's business; or any other cause or causes (whether or not similar in nature to any of those specified above) beyond 80/20's control, including but not limited to modifications to the fabricating specifications requested by the Buyer subsequent to commencement of production by 80/20.

12. NO WAIVER. The failure of 80/20 upon knowledge of any default or violation by Buyer of any of the Terms and Conditions of this Quotation, or any sales agreement entered into hereafter, to enforce its rights or remedies shall not be construed as a waiver of such default or violation, or of any provision hereof, or of any of its rights or remedies.

13. LIMITATION ON LITIGATION/ATTORNEY FEES. Any controversy or claim of Buyer arising out of or related to any transaction with 80/20 must be commenced within one (1) year after the cause of action has accrued. 80/20 shall be entitled to reimbursement of all costs and expenses, including reasonable attorneys' fees, from the Buyer relating to any lawsuit in which 80/20 prevails in any amount or on any claim.

14. ENTIRE AGREEMENT/LAW AND FORUM/SEVERABILITY. Except as otherwise agreed in writing or if another writing incorporates these terms thereby making these terms supplemental to such writing, this constitutes the entire agreement between 80/20 and Buyer, superseding all prior Quotations and understandings, oral or written. All such previous communications are hereby abrogated and withdrawn, and no stipulations, representations or agreements by 80/20, or its officers, agents, or employees shall be binding upon 80/20 unless reduced to writing and attached to and incorporated by reference herein, and no local, general, or trade custom shall alter or vary the terms hereof. Any questions, disputes, controversies, or litigation between 80/20 and Buyer, including but not limited to disputes concerning the validity, interpretation, or effect of the Quotation, or interpretation and enforcement of the rights and obligations of the parties hereunder, shall be governed by the laws of the State of Indiana and the exclusive venue for resolving any such questions, disputes, controversies, or litigation shall be a state or federal court located in Allen County, Indiana. If any provision of this Quotation is determined invalid under applicable law, such invalidity shall be limited to such provision without invalidating the remainder of the other Terms and Conditions hereof; and if any provision of this Quotation is found to be ambiguous or in conflict with any other provision of this Quotation, such ambiguity or conflict shall be resolved in the manner which provides the greatest protection and limitation of liability to 80/20.

15. INSURANCE. 80/20 will maintain Workers' Compensation insurance coverage at such levels as are required under the laws of the State of Indiana. 80/20 will purchase and maintain comprehensive general liability insurance against claims for personal injury or death or damage to property which may arise out of, or result from, 80/20's performance of the services in such amounts as 80/20 maintains in its ordinary course of business.

16. LIMITS OF LIABILITY. 80/20 will not be liable for any punitive damages or legal fees or any special, indirect, or consequential damages (including but not limited to loss of use or loss of profit) or fees which arise out of the performance of the services by 80/20. 80/20 and Buyer agree that absolutely no action arising out of the services may be brought by either party more than one year after substantial completion of the services. The entire liability of 80/20, or its officers, directors, agents, or employees, and Buyer's exclusive remedy for performance or nonperformance of the services shall be the adjustment or correction of the services by 80/20. If after repeated efforts, 80/20 is unable to adequately perform, Buyer shall be entitled to recover a pro-rata credit for the sums actually paid for the defective portion of the services.

17. TERMINATION OR CANCELLATION. Either party may terminate the services and all obligations arising under the proposal for the reason of the failure by the other party to comply with its obligations upon 30 days prior written notice to the other party. In the event of such termination, Buyer will pay to 80/20 all amounts which are due and payable to 80/20 for the services performed through the date of such termination. In addition, in the event the services are terminated as the result of the failure of Buyer to perform its obligations, Buyer will pay to 80/20 a termination charge of 20 percent of the cost of the remaining services to be performed by 80/20.

T-slot Profiles

Picking Your Profile

Typically, it's easiest to start by deciding on your profile series. Think about the end purpose of your application to help you narrow down your search for the profile that fits your needs. 80/20 offers profile series in both the fractional and metric family that accommodate the entire scale of small, medium, and large builds.

Your profile should be determined by deciding on the scale, weight, strength, surface (smooth, grooved), open T-slot requirements, color, finish, and shape that you need.

Throughout planning your project, you'll want to be sure all of the subsequent products, such as your fasteners and accessories, are compatible with the profile series you've chosen. Just look for the appropriate icon when shopping.

COMPATIBILITY KEY

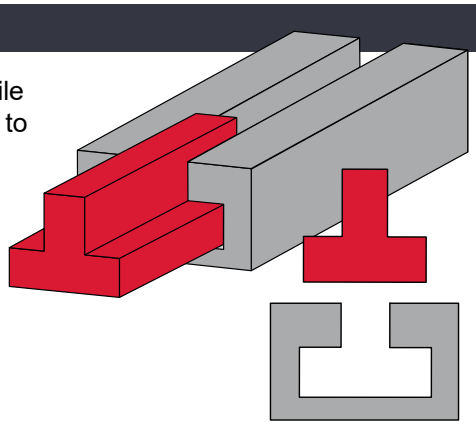
F Fractional	M Metric	30 30 Series
10 10 Series	20 20 Series	40 40 Series
15 15 Series	25 25 Series	45 45 Series
RT Ready Tube®	QF Quick Frame®	

The T-slot Concept: Built-in Modularity

T-slot aluminum profiles offer several benefits. The shape of the profile creates modularity, meaning it is easily assembled and reassembled to conform to evolving needs.

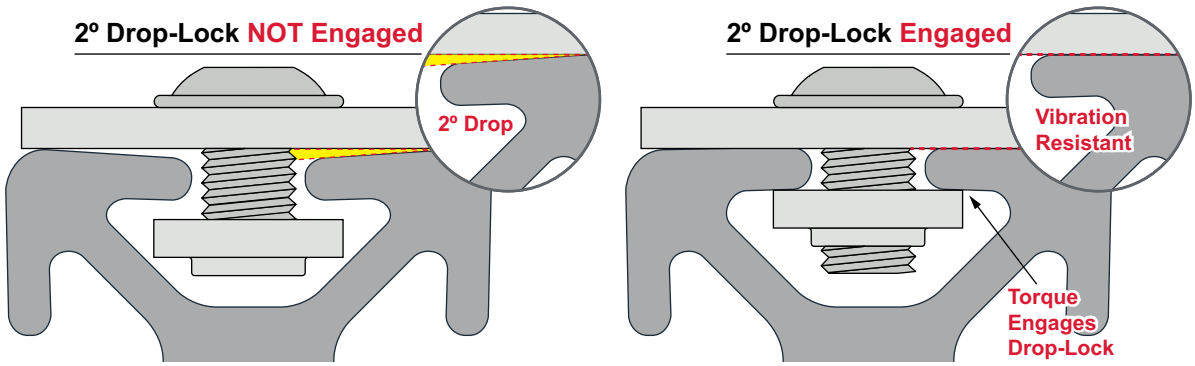
The T-slot also provides the ability to add connections and join profiles to captivated ends. This allows you to change your design without having to start from scratch and also enables easy expansion and retraction of your build for changes down the road.

The T-slot profile concept is designed to allow movement while staying secure within the T-slot.



The T-slot Profile 2° Drop-Lock

Another important attribute of T-slot aluminum profiles is the strong connection made between profiles. 80/20's T-slot aluminum profiles include a 2 degree drop-lock feature for most profiles, which enables connections to remain vibration resistant and strong. 80/20 offers a wide variety of joining options to fit your specific needs (for an overview on fastening products flip to page 3-6).



The Battle of Aluminum vs Steel

Think about the fact that, volume for volume aluminum is one third the weight of iron, steel, copper or brass. Yet it has yield strength of 35,000 psi, which means it is comparable to A36 steel carbon (frequently used in applications such as equipment and machinery supports as well as building frames). Furthermore, aluminum is resilient and can flex under loads or reshape itself after the shock of impact.

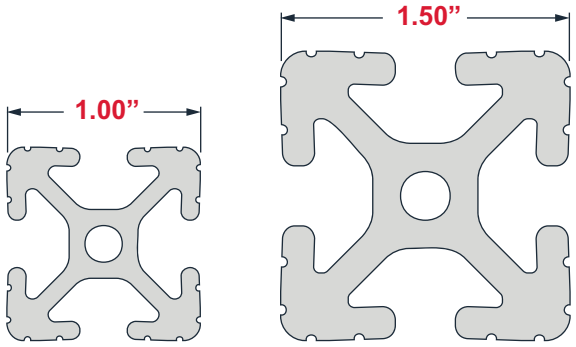
T-slot Profiles

Profile Family Types

Fractional

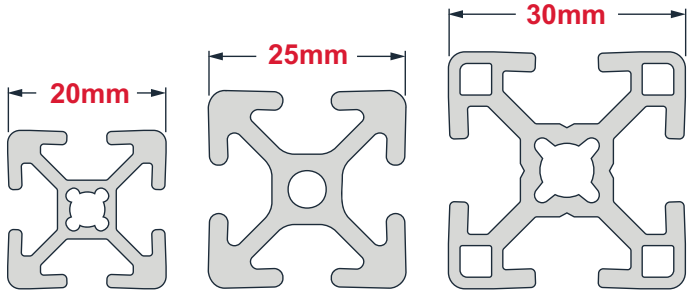
The fractional T-slot family uses an inch measurement system (imperial). 80/20 currently offers two standard series; the 10 series and the 15 series. 10 series profiles are based on a 1 inch standard while 15 series profiles are based on a 1.5 inch standard.

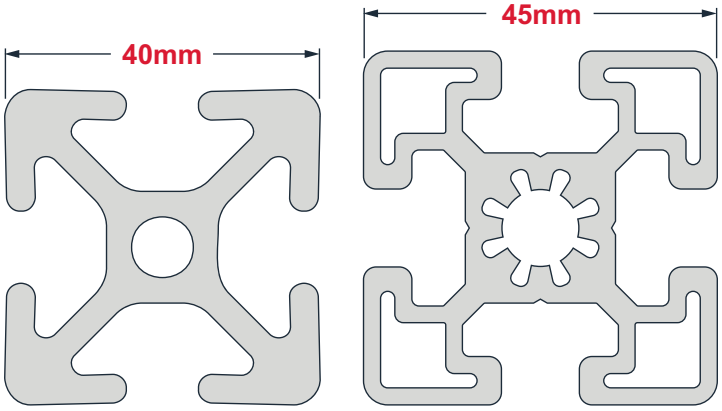
Align-a-groove options are featured on both 10 series and 15 series T-slot profiles, aid in aligning and squaring corners and joints during assembly. Align-a-grooves are not available in metric profiles.



Metric

The metric T-slot family is measured in meters or millimeters (mm). 80/20 currently offers five series in metric units; 20, 25, 30, 40 and 45. The dimensions of the metric profiles each coincide with the series; for instance, 20 series profiles are based on a 20mm standard, 25 series are based on a 25mm standard, 30 series profiles are based on a 30mm standard and etc.





Need to Know
80/20 currently offers both metric and fractional T-slotted profiles with over 100 profiles available across 7 series types.

After you have decided which measurement system you are going to use, you'll want to decide on a specific profile series. Think about the weight and strength you will need, as well as the shape and open T-slots you want available.

Consider your application and its purpose to help you narrow down your search for the profile that fits your need. 80/20 offers profile series in both the fractional and metric family to accommodate small, medium, and large-scale builds. A prototype project is an example of a small-scale build while a desk or workstation is an example of a medium-scale build. Profiles used for structural framing would be an instance of a large-scale project.

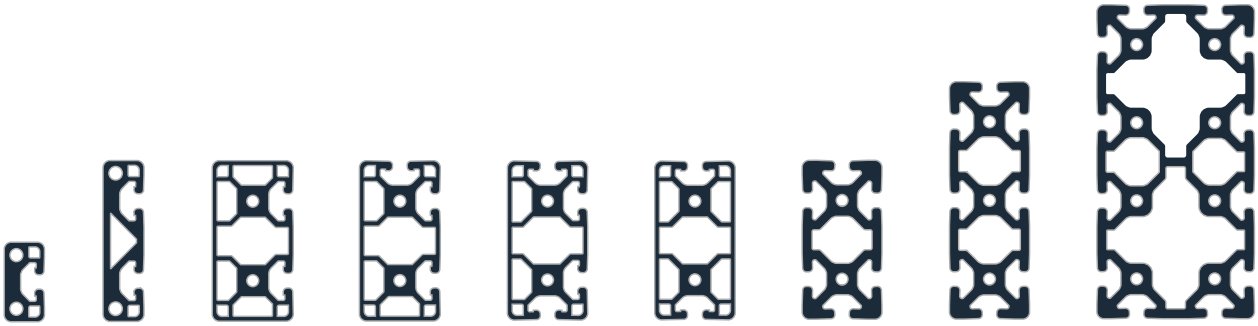
80/20 BUILD YOUR IDEA
More on 80/20® products available at 8020.net

The Shape of a Profile

Once you have determined a series that matches the scale of your build, you are ready to choose the shape of your profile. The shape of the profile affects certain properties such as aesthetics and open T-slots. The available shapes are square, rectangle, angled, and radius.

Square

In both the fractional and metric measurement families, 80/20 offers six different square profile shapes. This variety gives you choices to accommodate appearance, accessories and parts. For medium to large-scale applications consider a square profile with eight T-slot openings to allow a multitude of connection points for the addition of profiles and accessories. Some square profiles also include the capability of a pressurized center cavity.



Rectangle

Between the fractional and metric measurement families there are nine rectangle profile shapes and all work well for joining other profiles, parts and accessories. Most rectangular profiles have the capacity for a pressurized center cavity. The twelve-slot rectangle profile is perfect for large-scale purposes, such as load-bearing applications, and offers the most mounting and joining options.

Radius & Angle

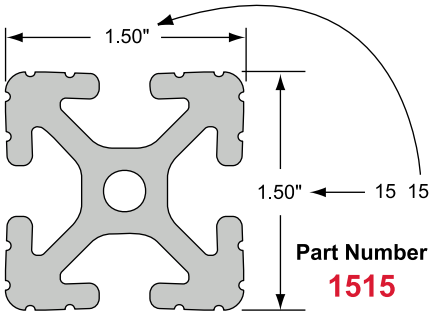
Angled and radius profiles come with 2 open T-slots and are frequently used for panel mounting and exhibits due to their versatility and sleek appearance. The rounded shape of radius profiles works well as hand rails.

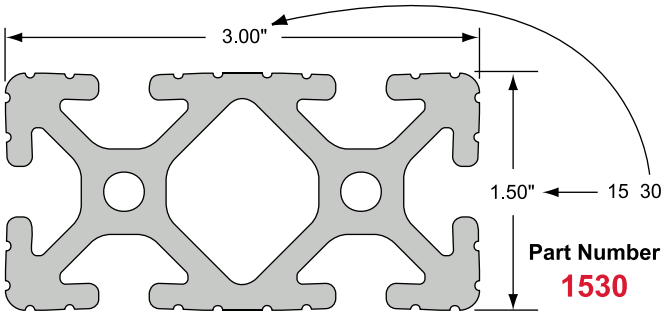
T-slot Profiles

Part Number Concept & Identification

Most fractional and metric T-slot profiles have part numbers that directly coincide with the profile's physical measurements. Fractional profile part numbers contain four characters. Metric profile part numbers contain six characters, which relate to the profile's series and dimensions. This series part-numbering concept is explained in more detail below.

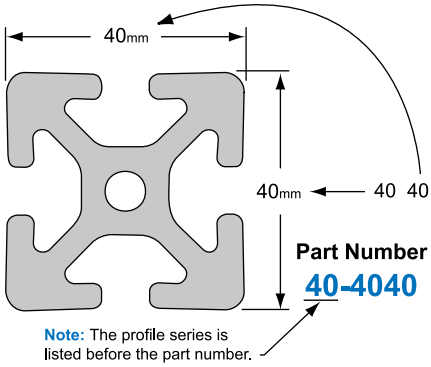
Fractional Profile Naming Standards

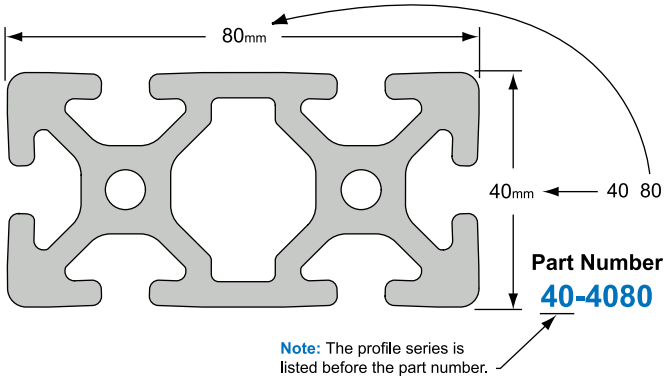




Example: 15 series profiles always measure .75" from the outside edge of the profile to the center of the T-slot.

Metric Profile Naming Standards





Example: 40 series profiles always measure 20.00mm from the outside edge of the profile to the center of the T-slot.

Basic Concept
The dimensions of your profile usually spell out its part number.

80/20 BUILD YOUR IDEA

Black Anodize

80/20 offers over 1,000 black anodized profiles and parts for your custom designs; these are stocked in-house to provide fast and easy access. We use architectural and organic anodizing processes and both meet Military Spec 8625.

You'll find that black anodize makes your projects look sleek while also providing functionality. Black anodize is ideal for low reflective projects, photo booths, military applications, vision systems and anywhere you want to add a polished appearance.

Need to Know
When ordering black anodized products with machining services, these areas will be exposed, meaning not black. If you would like your profiles or parts completely black, including the machined areas, we can accommodate. Contact us for more details.

Why 6005A-T61 Aluminum Alloy?

All of 80/20's T-slot profiles are made of 6005A-T61 or comparable alloy, an aluminum extrusion alloy that is a metal mixture which includes other elements such as copper, magnesium, iron, silicon or zinc.

Certain properties such as strength, machinability and corrosion resistance are influenced by the choice of alloy and temper.

Alloy 6005A with a T61 temper has better machinability and strength than 6063-T6.

6005A ↑ **Alloy**

T61 ↑ **Temper**

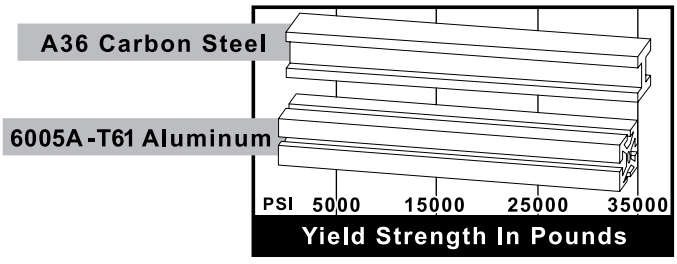
	Tensile Strength - ksi*	
Aluminum Profile Alloys: Number and Characteristics	Ultimate minimum	Yield minimum
6005A-T61 (80/20's Alloy)	38.00	35.00
6063-T6	30.00	25.00

Figures based on material thickness of 0.125" to 1.00"
From The Aluminum Extrusion Manual, published by The Aluminum Association and the Aluminum Extruders Council.

Material Strength Specifications

Minimum Yield Strength In Pounds

- 80/20's 6005A-T61 alloy yield strength of 35,000 psi compares to A36 carbon steel's yield strength of 36,000 psi.
- Volume for volume, aluminum weighs about 1/3 as much as iron, steel, copper, or brass.

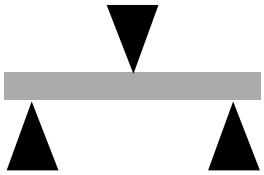


T-slot Profiles

Simple Beam Deflection Calculations

Formula A

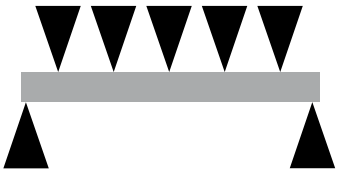
$$\frac{L^3 \cdot W}{48 \cdot E \cdot I} = D$$



This formula will yield worst case deflection for a beam supported at both ends with the load centered over the span.

Formula B

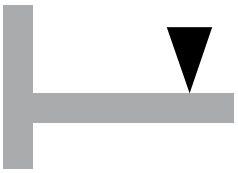
$$\frac{5L^3 \cdot W}{384 \cdot E \cdot I} = D$$



This formula will yield worst case deflection for a beam supported at both ends with the load evenly distributed over the span.

Formula C

$$\frac{L^3 \cdot W}{3 \cdot E \cdot I} = D$$



This formula will yield worst case deflection for a beam fastened at one end and cantilevered horizontally with the load applied at the end of the beam.

Example Using Formula A:
Using the 1515 T-slot profile, a length of 30.00 inches, and an applied force of 50 pounds, you should find the approximate beam deflection to be .011 inches. Using the 40-4040 T-slot profile, a length of 762mm, and an applied force of 222.40 Newtons, you should find the approximate beam deflection to be .21mm.

Formula Reference:

L = Length in Inches
W = Load in Pounds
I = Moment of Inertia
E = Modulus of Elasticity
D = Deflection in Inches

T-Slot Profile Specifications

Fractional		Metric
35,000 p.s.i. (min)	Yield Strength	241.1 N/mm² (min)
38,000 p.s.i. (min)	Tensile Strength	262.0 N/mm² (min)
A5 minimum 10%	Elongation	A10 minimum 8%
10,200,000 lb/in.²	Elasticity E	70,326.5 N/mm²
Rockwell approximately E-88	Hardness	Brinell approximately 75 HB
.004" per 1 inch of width	Flatness	0.1mm per 25.4mm of width
0.0125 inches per 1 foot of length not to exceed 0.118 inches over 20 feet of length	Straightness	0.32mm per 304mm of length, not to exceed 3mm over 6.1 m of length
Per 1 foot of length not to exceed .25 degree and total twist over 20 feet of length not to exceed 1.5 degrees	Twist	Per 304mm of length not to exceed .25 degree and total twist over 6.1m of length not to exceed 1.5 degrees

Note: Extrusion conforming to DIN 17 615 specifications. Unless otherwise specified, all profiles will have etch and clear (MIL-A-8625F) anodizing with depth of .0004 inches (0.010mm) and surface hardness of approximately 250 HV (anodized profiles should not be welded because of toxic fumes).

25-3896	25 Series Anchor Fastener Assembly	25-2525	4	23
25-3895	25 Series End Fastener Assembly	25-2525	5	23

The estimated torque calculations in this chart are offered as a guide only. Use of this content by anyone is the sole responsibility of that person and they assume all risk. Due to many variables that affect the torque-tension relationship like human error, surface texture, and lubrication the only way to determine the correct torque is through experimentation under actual joint and assembly conditions.

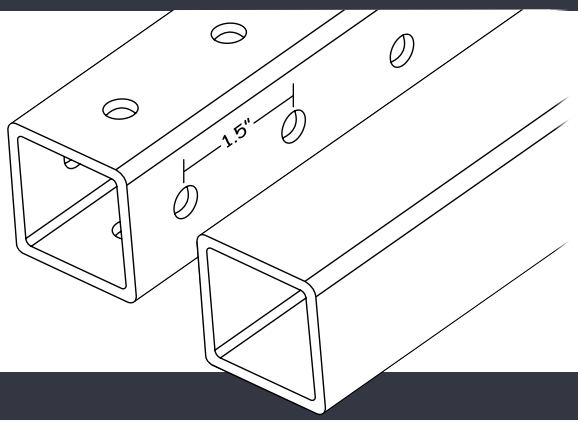
Ready Tube® Profiles

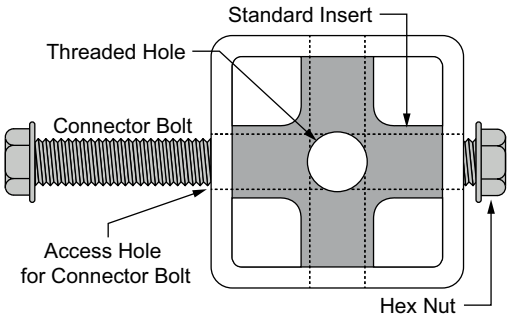
Introduction to Ready Tube®

Ready Tube is an alternative to steel tubular framing; it is lightweight yet strong and durable. Ready Tube is also corrosion resistant, easy to assemble and cost-effective. Ready Tube is appropriately named; it is ready to use without the need for additional machining.

Ready Tube is available with or without pre-drilled holes. Profiles with pre-drilled holes have 1.50" centerlines between holes, which enables quick and easy connections.



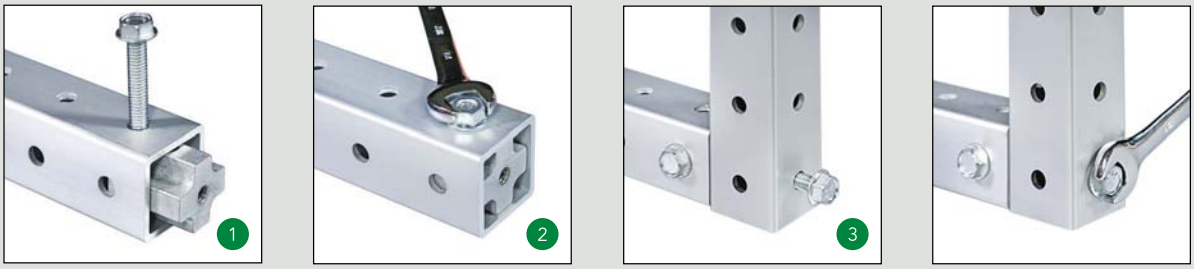
How Ready Tube Works



The most commonly used fastener for Ready Tube is the Standard Tube Insert which requires only a wrench to connect. It includes a connector bolt, hex nut and insert that goes inside the Ready Tube profile and is accessed by the pre-drilled holes. 80/20 does offer additional fasteners for Ready Tube; for more information flip to page 3-205.

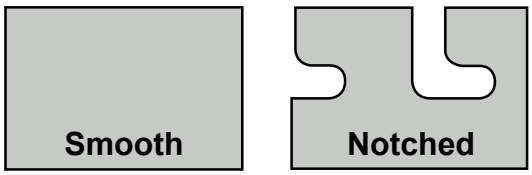
Only need a wrench!

Ready Tube Step-by-Step Assembly



The Shapes of Ready Tube

The properties of Ready Tube make it perfect for evolving and changing applications. It works well in builds such as workstations, tables, carts, flow racks, and material handling shelving and racks. When using Ready Tube in your build you have 3 main profile options; square, P-tube, and A-tube.



Square Ready Tube profiles are easy to clean and aesthetically appealing, while P-tube profiles have flanges that work well for holding panels. A-tubes are available with or without notches and are perfect for applications such as gravity racks or material handling shelves.

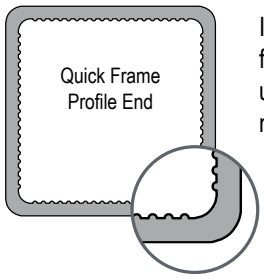
80/20 BUILD YOUR IDEA
More on 80/20® products available at 8020.net

QF Introduction to Quick Frame®

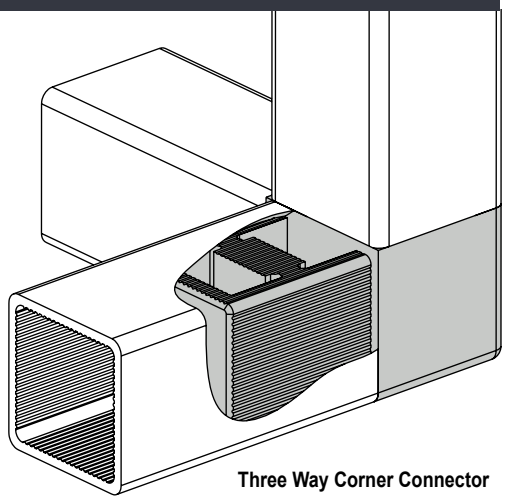
Quick Frame is an alternative to steel tubular framing and wood construction. It is simple to use, lightweight and can help reduce your product cost. Quick Frame requires few parts for assembly and connects with just one tool. It is a boltless method that fastens with nylon tube inserts. This means that Quick Frame does exactly what its name implies; connects quickly to form light yet sturdy builds.

How Quick Frame Works

Quick Frame profiles are designed specifically to work with Quick Frame connectors; they have built-in ridges that bite into the connector to create tension without the use of hardware. The profiles connect quickly and easily using only a soft-faced mallet to form light-duty yet sturdy builds.



Internal grooves in the Quick Frame profile hold connector in place without the use of additional hardware. A soft-faced mallet is all that is required for assembly.



Three Way Corner Connector

Quick Frame Step-by-Step Assembly

The Shapes of Quick Frame

There are 3 main shapes when it comes to Quick Frame; square, flanged, and twin flanged. Square profiles hinder dirt and debris buildup and are easy to clean while single flanged profiles are perfect for building doors or adding panels. Twin flanged profiles hold panels in place for vertical applications such as enclosures.

Need to Know
Quick Frame is a light-duty alternative to its heavier steel counterpart, with options for flanged ends to hold guarding.

Within both the flanged and twin flanged shapes you can choose from either a single flange, a right angle flange or a double flange, allowing you to find the specific Quick Frame profile perfect for your build.

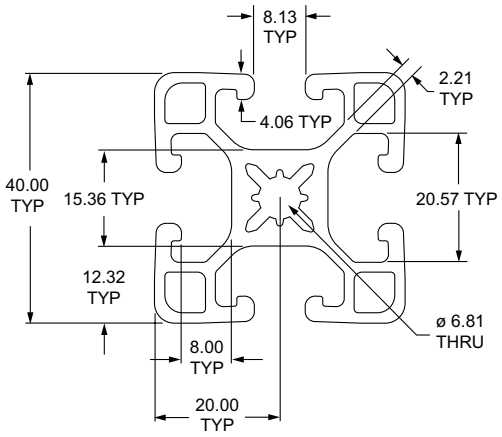
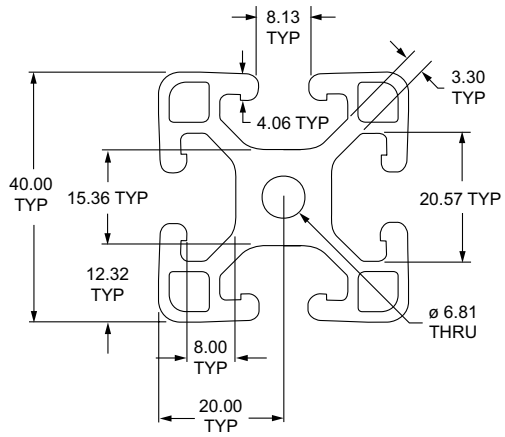
40mm X 40mm Ultra-Lite T-slotted Profile - Four Open T-slots



Part No.	Series	Stock Length	Material	Alloy (or comparable)	Finish	Drop Lock	Moment of Inertia	Surface Area	Yield Strength	Modulus of Elasticity	Weight
40-4040-UL	40	3 or 6.050 Meter	Aluminum	6005A – T61	Clear Anodize	2°	IX = 8.7059 cm^4 IY = 8.7059 cm^4	5.750 cm^2	241.1 N / mm^2	70,326.5 N / mm^2	1.5533 kg / m
40-4040-UL-Black		3 or 6.050 Meter			Black Anodize						
40-4040-UL-Black-FB		per millimeter			Black Anodize						

40mm X 40mm Lite T-slotted Profile - Four Open T-slots



Part No.	Series	Stock Length	Material	Alloy (or comparable)	Finish	Drop Lock	Moment of Inertia	Surface Area	Yield Strength	Modulus of Elasticity	Weight
40-4040-Lite	40	3 or 6.050 Meter	Aluminum	6005A – T61	Clear Anodize	2°	IX = 9.3983 cm^4 IY = 9.3983 cm^4	6.608 cm^2	241.1 N / mm^2	70,326.5 N / mm^2	1.7860 kg / m
40-4040-Lite-Black		3 or 6.050 Meter			Black Anodize						
40-4040-Lite-Black-FB		per millimeter			Black Anodize						

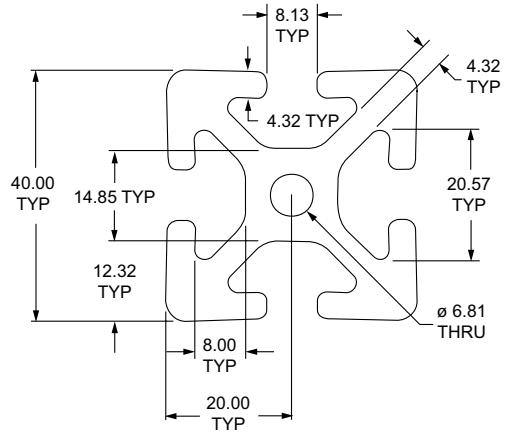
Standard Machining Services for 40mm x 40mm

Service No.	Series	Service Description	Reference Page
40-7010	40	Cut to Length	10-2
40-7050		Access Hole	10-5
30-7044		Anchor Counterbore	10-7
40-7059		Tap Profile End	10-3

Other machining services available in Section 10

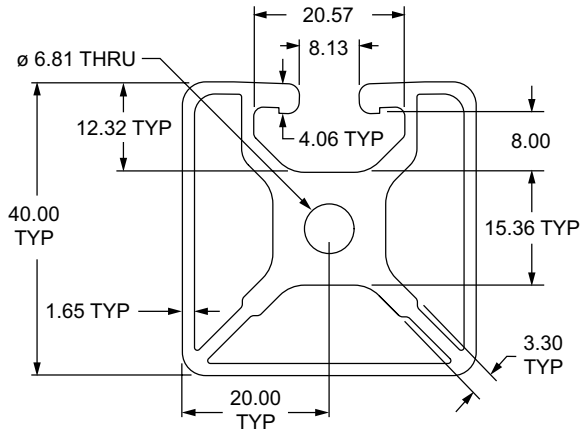
T-slot Profiles

40mm X 40mm T-slotted Profile - Four Open T-slots



Part No.	Series	Stock Length	Material	Alloy (or comparable)	Finish	Drop Lock	Moment of Inertia	Surface Area	Yield Strength	Modulus of Elasticity	Weight
40-4040	40	3 or 6.050 Meter	Aluminum	6005A – T61	Clear Anodize	2°	IX = 13.7870 cm^4 IY = 13.7870 cm^4	8.742 cm^2	241.1 N / mm^2	70,326.5 N / mm^2	2.3640 kg / m
40-4040-Black		3 or 6.050 Meter			Black Anodize						
40-4040-Black-FB		per millimeter			Black Anodize						

40mm X 40mm T-slotted Profile - Single Open T-slot



Part No.	Series	Stock Length	Material	Alloy (or comparable)	Finish	Drop Lock	Moment of Inertia	Surface Area	Yield Strength	Modulus of Elasticity	Weight
40-4001	40	3 or 6.050 Meter	Aluminum	6005A – T61	Clear Anodize	2°	IX = 8.5389 cm^4 IY = 8.2599 cm^4	5.968 cm^2	241.1 N / mm^2	70,326.5 N / mm^2	1.6142 kg / m
40-4001-Black-FB		per millimeter			Black Anodize						

Standard Machining Services for 40mm x 40mm

Service No.	Series	Service Description	Reference Page
40-7010	40	Cut to Length	10-2
40-7050		Access Hole	10-5
30-7044		Anchor Counterbore	10-7

Fasteners

Introduction to Fastening Methods

There are several options when choosing your fastening method. The intent of this section is to give an overview of points to consider as well as a brief summary of fastening options. While the variety may seem overwhelming, you can narrow down your selection based on properties of your desired fastener.

Keep in mind that in most instances, there is no “one right way” or “one right answer” when choosing your method. It will depend on personal preference, circumstance, application, design and purpose.

Fastening Method Types

As a way to simplify your decision-making process, it’s easiest to categorize fasteners into two main groups; internal fasteners and external fasteners. Most of the fastening connections offered by 80/20 fall into one of these two groups and each group has unique attributes and properties.

Internal

Internal connections create strong bonds between profiles because in most cases the fastener is machined into the profile. They are easy to assemble, require few parts and are simple to work into your design.

- Fastener recessed in T-slot
- Fewer parts
- Easy to assemble
- Easy to incorporate
- Hardware typically included
- Hidden connections available
- Options for infinite positioning
- Typically will not affect overall size

External

External connections mount to the outside of the T-slot, strengthen connection points, and are easy to implement into the application. Most external connections are reconfigurable and can be mounted anywhere along the T-slot.

- Mount to T-slot
- Usually no machining required
- Options for infinite positioning
- Easy to implement
- Reconfigurable connections
- Ability for variable angles
- Reinforce connection points
- Assemble with simple hardware
- Options for connecting more than two profiles

Fasteners

T-Nut Types

80/20 offers a wide variety of hardware with options in size, material, shape, thread alignment, and installation method. Three popular types of T-nuts are slide-in, drop-in, and roll-in.

Drop-In T-Nut

Drop-in T-nuts load from anywhere on the profile, making them perfect in instances where the ends of the profiles are captivated and you want to add to your application without dismantling the frame.

Roll-In T-Nut

Roll-in T-nuts load from their side and spin into place, which allows for infinite positioning along the T-slot. They can be used even when profiles are captivated. Roll-in T-nuts come in several variations, including self-aligning and features to hold the T-nut in place for easy positioning.

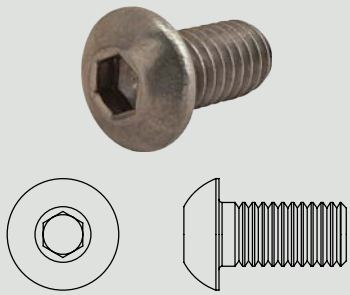
Slide-In T-Nut

Slide-in T-nuts load from the end of the profile and are available in several configurations including a centered or offset thread, and material and finish options.

Hardware Options

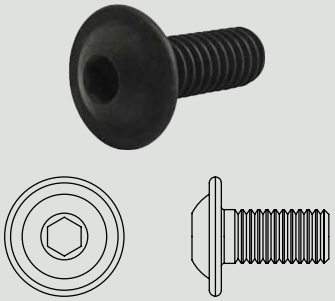
80/20 offers a wide variety of bolt fastening options. Some of the most frequently used are Button Head, Socket Head, Flanged Button Head, Flat Head and Low Head.

Button Head (BHSCS)

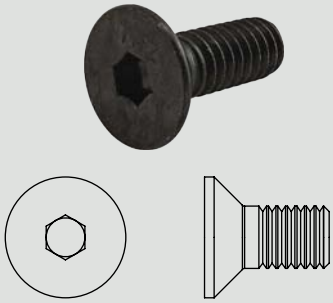


Socket Head (SHCS)

Flanged Button Head (FBHSCS)



Flat Head (FHSCS)



Low Head (LHSCS)

What's it made of?
Possible hardware materials include: Black Zinc, Bright Zinc, Blue Zinc and Stainless Steel.

Fasteners

RT Ready Tube® Fasteners 101

80/20 offers several fastening options for Ready Tube profiles. While the most common is the Ready Connector Kit, there are also additional internal and external connection methods. Because Ready Tube profiles have pre-drilled holes, the connection methods do not require machining.

Only need a wrench!

Ready Tube Step-by-Step Assembly

Standard Insert Kit

The Standard Tube Insert Kit includes all of the hardware you will need to easily assemble your project. This method is used for 90 degree connections when the end of the mounting profile is exactly .750” of an inch from the first hole centerline.

Extended Insert Kit

The Extended Tube Insert Kit also includes all of the hardware you will need to easily assemble your project. This kit is used in instances when the end of the mounting profile is not exactly .750” of an inch from the first hole centerline.

Roll Pin

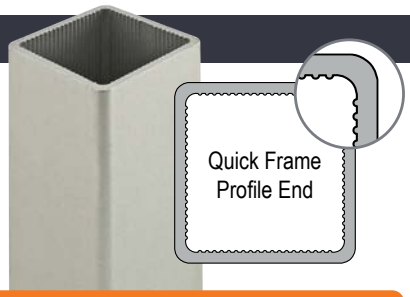
The roll pin is commonly used with the standard tube insert and is an internal connection method for Ready Tube. It provides a smooth, clean finish and eliminates the need for protruding hardware when used with Ready Tube connector kits.

Compatible with Additional 15 Series Fasteners

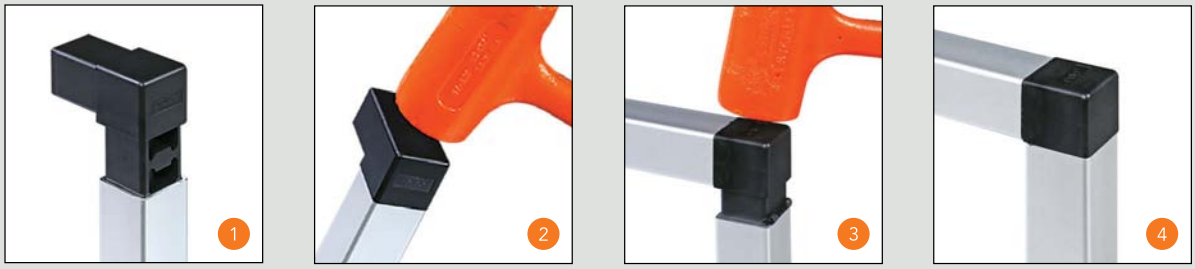
80/20 corner brackets, gussets, and flat plates can also be used to make connections between Ready Tube profiles. All of these connection methods are external, meaning that they are easy to use, reconfigurable, and mount directly to the profile.

Quick Frame® Fasteners 101

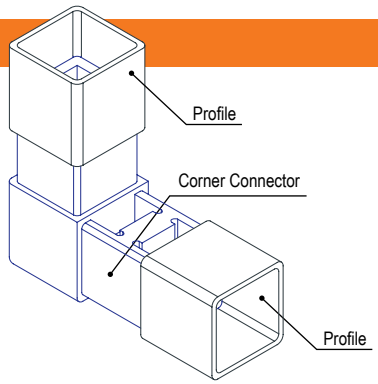
80/20 Quick Frame connectors are made of black or gray nylon and used with a Quick Frame Profile which has built-in ridges that bite into the fastener to create tension without the use of additional hardware. The profiles connect quickly and easily using only a soft-faced mallet to form light-duty yet sturdy builds.



Quick Frame Step-by-Step Assembly



No Machining, No Additional Hardware



80/20 Quick Frame connectors require no machining or additional hardware for assembly. This fast and efficient method is perfect for lightweight and cost-effective applications that still require a sturdy and secure connection. Quick Frame connectors also do not degrade and can even be submerged in water without deteriorating.

Variety of Fastening Options

80/20 has a variety of Quick Frame fastening options that enable connections between multiple profiles (up to eight using just one connector) as well as options to join profiles at varying angles. 80/20 also offers base connectors for projects that will be attached or mounted to any flat surface or T-slot profile. Use a soft faced mallet to install Quick Frame connectors.

Internal Fasteners

Standard Anchor Fastener

- One of the strongest fastening methods
- Consists of SHCS, cam & T-nut
- Requires counterbore machining service (pg. 10-7)
- Infinite positioning, flush connection

5 Hole - "L" Flat Plate

- No machining required
- Pre-load to simplify assembly
- Reconfigurable, reusable
- Forms a corner connection
- Creates 90º angle between profiles

Panels & Doors

Introduction to Panels & Doors

80/20 has an extensive in-house panel shop with a wide variety of wire, mesh and plastic panels. Our panels are frequently integrated into design plans and builds. They are great for guarding, enclosures, desk tops and shelves, among other applications. 80/20 carries an impressive stock of roughly 100 panels in different sizes, shapes, thicknesses, colors, and materials. Keep in mind that 80/20 mesh, plastic panels, and aluminum plates are ordered by the square foot or square meter.

When deciding on your panel you'll want to make a thorough assessment of your needs. You will find that you have several choices to consider when incorporating paneling into your projects.

Optical Clarity

- Acrylic
- AR Polycarbonate
- ESD Polycarbonate
- Polycarbonate

Weather Resistance

- Acrylic
- Aluminum Composite
- Expanded PVC

- HDPE
- Lite Aluminum Composite

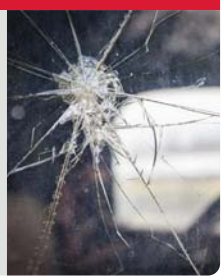
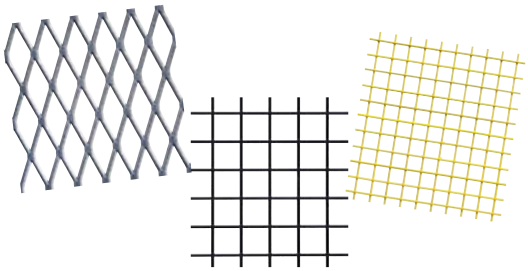
Impact Resistance

- Aluminum Composite
- Aluminum Plate
- AR Polycarbonate
- Lite Aluminum Composite
- Polycarbonate
- PVC/Acrylic



Expanded Metal & Wire Mesh

Expanded metal and wire mesh panels work well for guarding and enclosure applications where air flow is required. They provide a barrier and can be used to block off a machine, supplies, inventory, or equipment while still providing visual access. They are strong yet lightweight and are available in a range of materials and colors.



How Panels Are Used with T-Slot?

80/20 panels and mesh retainers can be used a couple different ways with T-slot profiles. You can either rest the panel in the T-slot or mount it flush with the T-slot profile. Guarding, enclosures, and access points lend themselves well to panels that rest within the profile while desks and furniture applications commonly have flush panels.

Tip: When sizing a panel that will be inserted into the T-slot, be sure to add extra material to your visible panel size.

Series	Add
10	.500"
15	.750"
20	10mm
25	14mm
30	15mm
40	22mm
45	24mm

Panel & Mesh Mounting Options

You have several options when it comes to mounting your panels and mesh. Consider your application; Is it being used to keep things in or out or both? Are you using a mesh panel? Will you be changing out the panel often? Will the project be used inside or outside?

The answer to these questions will help determine the type of mounting option you will want to use.

Retainers

Blocks

Gasket

Panels & Doors

Panel & Mesh Retainers

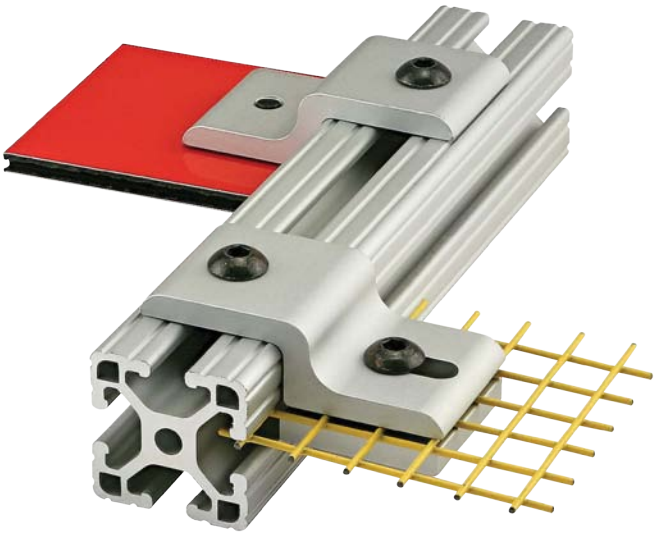
Retainers are easy to use and available in several sizes and shapes to fit your needs.

Panel Retainers:

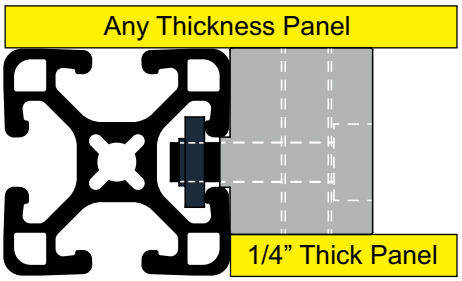
- Strong
- Cost-effective
- Corrosion-resistant
- Indoor or Outdoor Use
- Requires drill-through hole in panel

Mesh Retainers:

- Strong
- Cost-effective
- Corrosion-resistant
- Indoor or Outdoor Use
- Includes a backing plate
- No machining required
- Slotted holes for adjustability



Panel Mount Blocks



Panel mount blocks are a great way to mount your panel either flush with the profile or on the profile surface. They provide stability while reducing vibration and there are options available in aluminum or nylon.

Panel Gasket

Panel Gasket is used to it to help secure your panel and prevent it from rattling within the frame. Keep in mind that you only need to put panel gasket on one side of the panel. Here are a few other tips when using panel gasket:

- Cut your panel gasket 2-3 inches (50-76mm) longer than the opening to make the corners stay tight.
- When installing panel gasket, begin in the middle of your panel and work your way out.

Recommended Panel Thickness

Series	Panel Thickness
10	.177" / 4.50mm
15	.220" - .236" / 6.00mm
20	.118" / 3.00mm
25	.177" / 4.50mm
30	.220" - .236" / 6.00mm
40	.220" - .236" / 6.00mm
45	.220" - .236" / 6.00mm

Tips for Ordering Panels

Please note a drawing is required

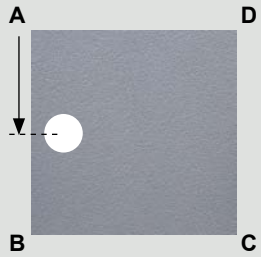
Panel Orientation:
When ordering panels it is important to indicate orientation:

Expanded Metal: Specify horizontal or vertical diamond orientation.

Twin Wall Polycarbonate: Specify horizontal or vertical channel orientation.

Phenolic Resin: Specify horizontal or vertical woodgrain orientation.

Textured Side:
Panels like PVC/Acrylic and ABS Haircell have a textured and smooth side. When machining is needed it's important to indicate which is outward with "T" for textured or "S" for smooth.



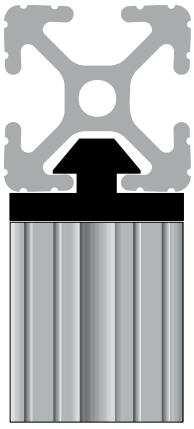
Machining Reference:
Beginning with the upper left corner, call outs are designated A, B, C, and D in a counterclockwise direction on panels. Referencing these call outs when ordering machining allows for proper measuring of the service position.

In this example, the service center line is measured down from A.

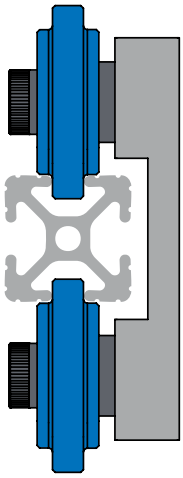
Motion within the T-slot

Door glides and roller wheels slide within the T-slot channel to enable movement of a door, panel, frame or other component. Create accessible displays or an entrance with a bi-fold door.

Glides are simple to use and bolt directly to a profile end to freely rotate as the door or application pivots. There is an option available that creates a bi-fold door without the use of a bottom rail.



Roller wheels mount directly to a T-slot or profile end and are ideal for guided linear motion. They are made of self-lubricating nylon with a permanent lubricated bushing available which reduces maintenance time and cost.

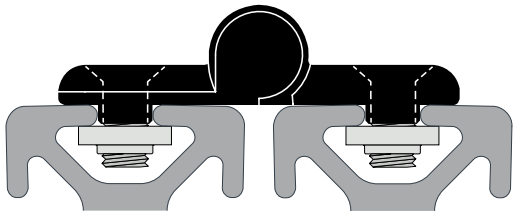


Panels & Doors

Variety of Hinge Options

80/20 offers a wide assortment of hinges in a variety of styles, materials, and sizes that can be mounted to a panel or profile to fit your requirements. From light to heavy-duty projects, there are a range of options available; choose from different materials such as plastic, zinc, or aluminum.

- Plastic hinges are typically used for lightweight doors and to connect plastic panels while aluminum hinges are a heavier-duty option.
- Lift-off hinges are popular as they can create a door that lifts off by using all right or all left lift-off hinges, or confine a door or access point by using a combination of left and right hinges.



Tip: To increase its load-bearing capacity and prevent it from rotating, choose hinges with slot tabs or slot pins. If needed, the tabs and pins can be removed when, for example, a panel is being mounted.

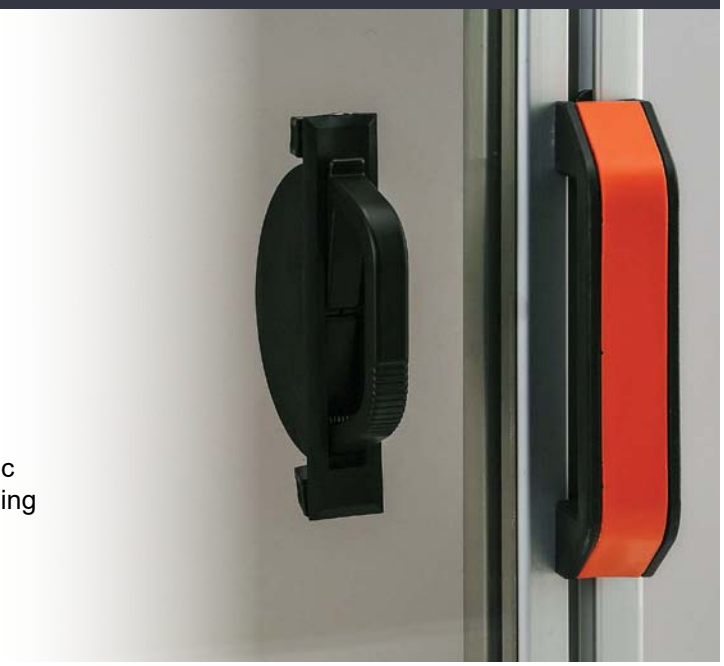
Finishing Touches, Handles & More

80/20 has a wide range of handles, locks and catches for your door or access point. Start off by deciding how frequently the door will be in use and whether you will want it to be locked.

Unlocked

Locked

If people will be using it often, consider ergonomic handles or offset handles that hinder finger-pinching injuries. There are also flush handles to prevent snags or heavy-duty latches for larger doors or magnetic catches to help ensure a connection.



Bi-Fold Door Configure

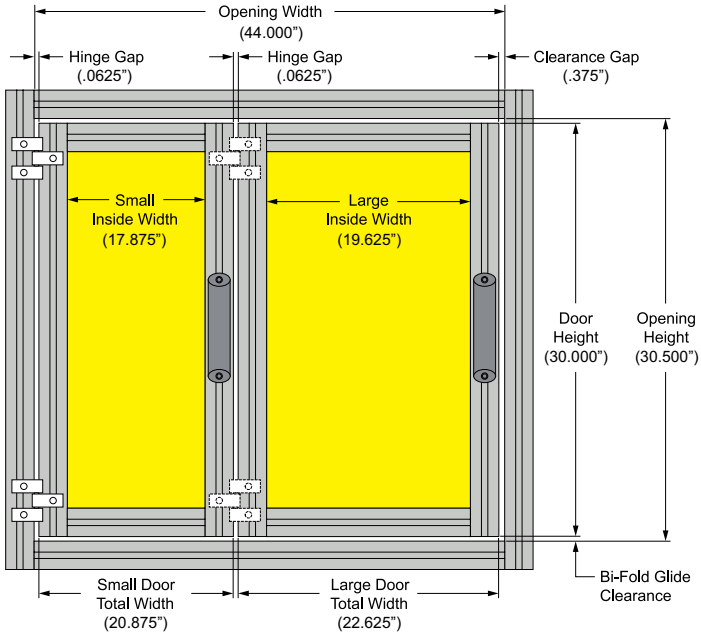
Designing a bi-fold door using 80/20® products is a straight-forward process. Simply remember to include the hinge and opening gaps when sizing the inside dimension of your door, while taking into account the profile size. Follow the steps listed and reference the drawing for the standard method of designing a bi-fold door.

Step 1: Select the profile you will use for building your bi-fold door. Typically this is the same as the frame.

Step 2: Determine the opening width of your door.

Step 3: Choose your hinge type and find the standard gap between profiles when using that hinge.

Step 4: Choose the total width for each inside door, remembering to subtract the hinge and clearance gaps.



How to determine the width of the small door (15 series):

Add together all of the hinge gap, the clearance gap, and 1.75" (1.125" for 10 series) for the overlay:

(.0625" + .0625" + .375" + 1.750" = 2.250")

Subtract the above total from the total opening width and divide by 2.

(44.000" - 2.250" = 41.750" ÷ 2 = 20.875")

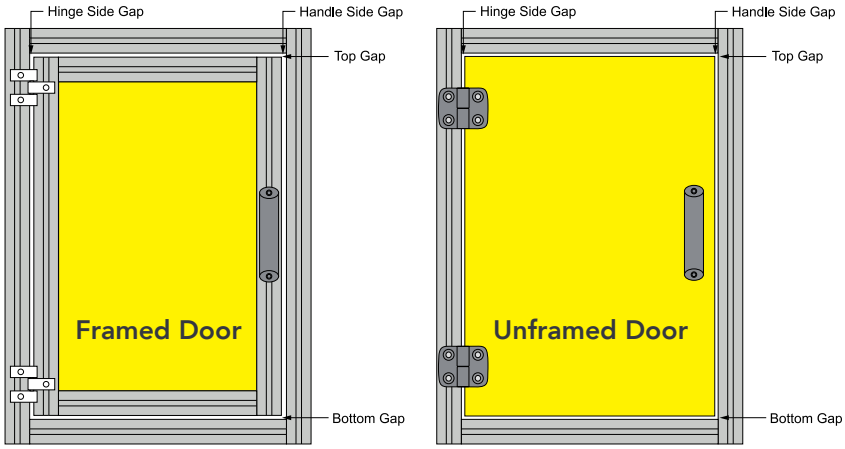
How to determine the width of the large door (15 series):

Take the width of the small door and add 1.75" (1.125" for 10 series) for the overlay:

(20.875" + 1.750" = 22.625")

Framed & Unframed Doors

- For both framed and unframed doors the hinge side gap depends on hinge.
- Framed Doors: There is a 1/4" (6.35mm) top, bottom and handle gap. When using door gasket subtract 1/8" (3.175mm).
- Unframed Doors: There is a 1/8" (3.175mm) top, bottom and handle gap.



Panels & Doors

Acrylic Panels

Magnetic Door Catch

- Ideal for latching plastic panels in place; estimated pull force of 12 pounds (5.443 kilograms)
- Mounting hardware included; requires panel tap service to mount striker plate (pg. 10-45)
- Use magnetic door catch bracket (pg. 4-130) to latch profiles together

Casters & Feet

Building the Base

Once you've got your design narrowed down it's time to start thinking about your base. There are several varieties available, from casters to furniture glides, leveling feet, or anchors. Some add movement and provide a swivel or a pivot, while others lock or reduce vibration. There are also feet that do just what their name implies; level or anchor your project. You can also choose from options that provide combinations of these features.

Mobile

Stationary

Anchored

You'll want to consider how often your application will need to be in motion or relocated. For example, work carts are constantly moving and turning while furniture only occasionally needs repositioned. In contrast, a guard or larger machine may never need moved or only very infrequently. There may also be a need to immobilize equipment. Determining the frequency of movement will help you decide if you need a caster, a leveling foot, a glide or perhaps a floor lock or anchor.

Consider the Capacity

After you've decided on the type of foot that works best for your project, you'll want to begin narrowing down your product choices. One of the main factors will be the required load capacity. Keep in mind that the ratings are per foot; if you're using multiple bases the weight will be distributed and provide a higher overall capacity.

Find Your Footing

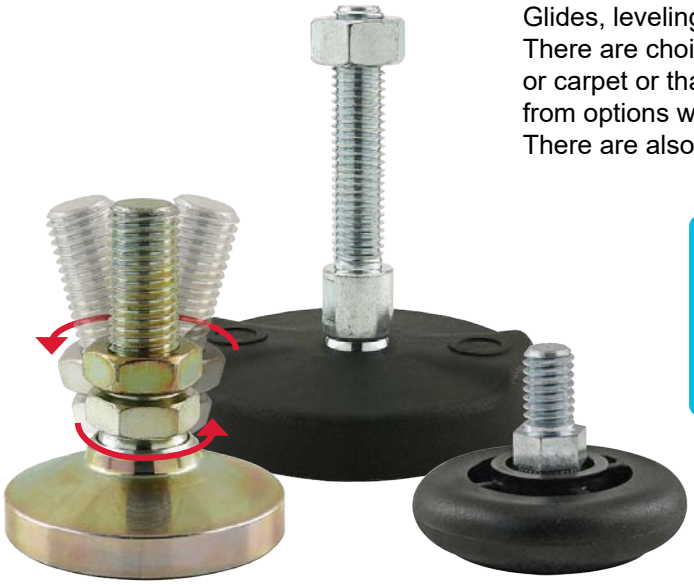
Casters, glides, bases, leveling feet and anchors are a great way to customize your application and design it to fit your specific space and purpose. There are several added features to choose from.

Caster Options

When using a caster, there are options available that swivel or remain rigid. Some of the casters also include locking mechanisms. The leveling caster is a great combination foot that incorporates both mobility and leveling features with one component.

The threaded stem swivel caster is one of many casters with or without brakes that 80/20 offers.

Leveling Feet, Glide Options



Glides, leveling feet and bases come in a wide range of varieties. There are choices suitable for different surfaces such as concrete or carpet or that provide leveling and shock-resistance. Select from options with a pad that help reduce and absorb vibration. There are also heavier and lighter-duty bases to pick from.

Options include feet that are both resistant to vibration and pivot up to 20 degrees to accommodate uneven floors.

Add Stability with a Base Plate

Many feet mount to the profile using a base plate. There are several plates available; this allows you to mount your foot anywhere along the profile T-slot or end, reducing limitations on where you can position the foot.

There are also alternatives that let you attach a foot directly to the profile end without the need for a base plate. You'll want to keep in mind that the profile will require an end tap.

Casters & Feet

Threaded Stem Swivel Caster

- Mounts directly to T-slot profile end or to profile side using base plate (pg. 5-40)
- Profile end mounting requires end tap machining service (pg. 10-3)

Adjustable Position Floor Lock

- Mounts to T-slot profile side using position floor lock base plate (pg. 5-39)
- Extends up to 2.75” (69.85mm); minimum weight required is 70 pounds (31.75 kg)
- Adjust holding force with tension nut from 70 pounds (31.75 kg) to 120 pounds (54.43 kg)

Casters & Feet

5 Hole - Center Tap Base Plate

- Mounts leveling feet and threaded stem casters
- Requires tap machining service (pg. 10-3) for end mount
- Using M12 SHCS, base plate can only be mounted to profile end

Linear Bearing Concept

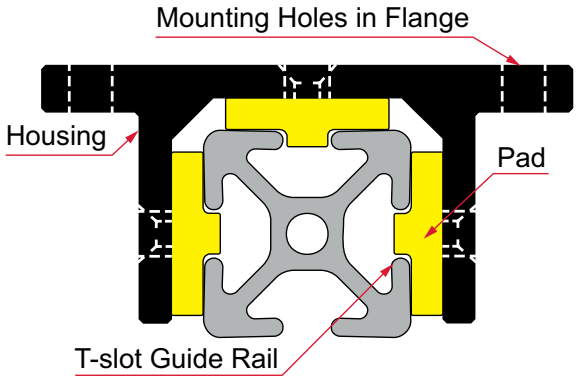
Linear bearings enable you to add repeated motion and movement to your project. As an example, linear bearings are commonly found in material transportation applications such as picking tools.

The core concept is that profiles act as guiderails and pads are inserted into the T-slot to enable movement. Pads are available in two options: standard or high-cycle.



Standard Pad

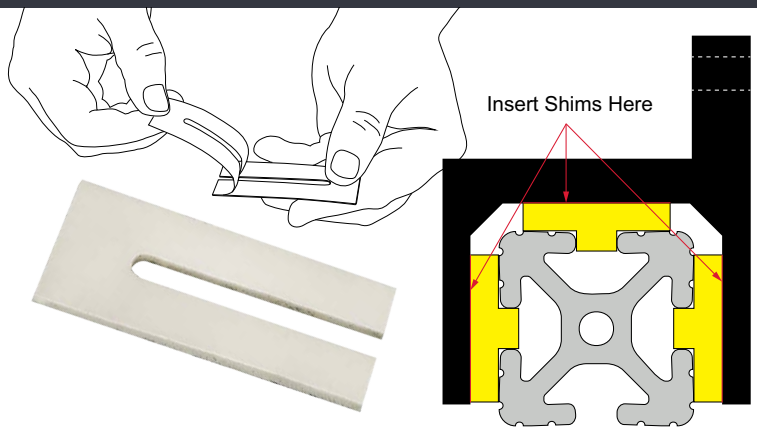
Perfect for solutions such as drawer glides, table saw fences, ergonomic workstations or adjustable stands. All pads are available in white and black styles.

High-Cycle Pad

These bearings have a special threaded insert designed for sudden acceleration and deceleration without deteriorating. This durable pad lends itself to actuators and parts-transfer equipment.

Linear Bearing Shims

Linear bearing shim stock is used to create a precise fit. Each shim is .005 inches (.127mm) thick and has a slotted design that enables easy installation without having to dismantle the bearing; simply loosen the bearing pad and slide the shim(s) between the pad and housing while the bearing is still in place. Shims are sold in packs of 10 and are compatible with all 80/20 bearings.

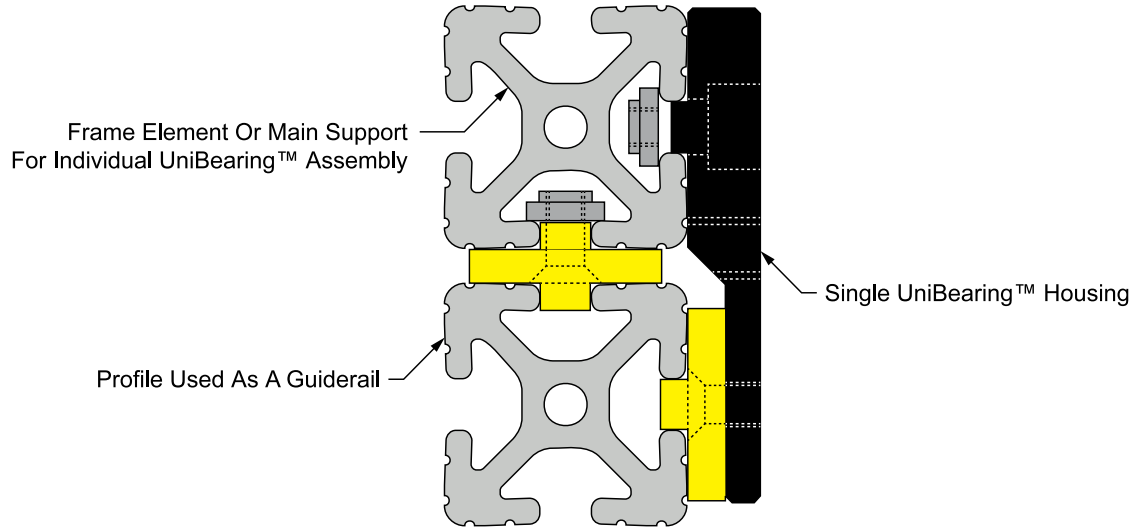


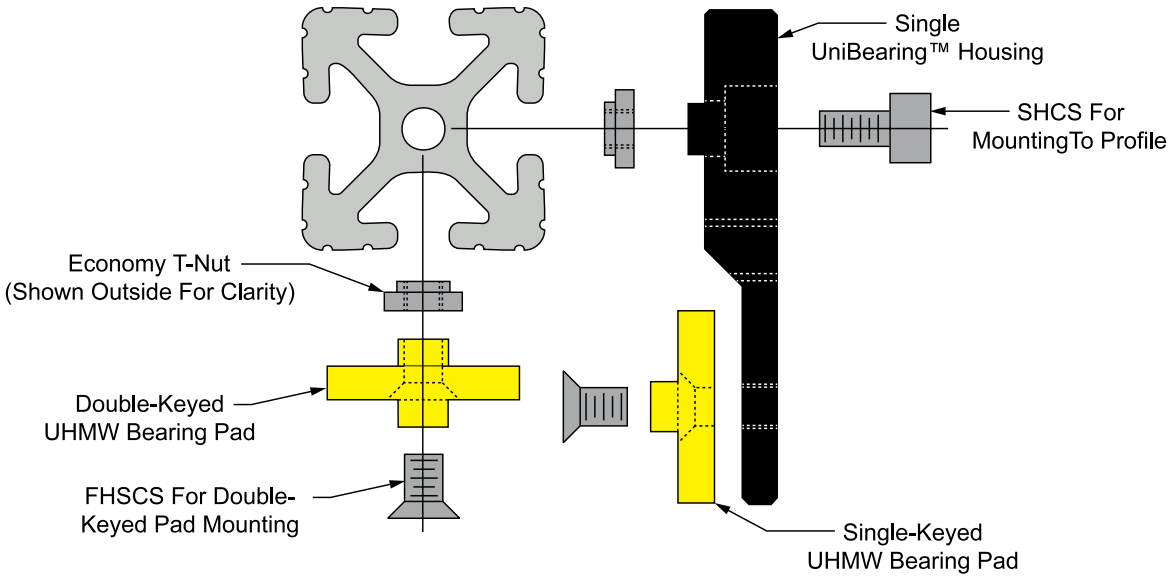
Bearings & Pivots

UniBearing™ Concept

80/20 offers a custom UniBearing™. It differs from the traditional linear bearing in that it is adjustable for a range of profiles and can be installed even when a T-slot profile is captivated.

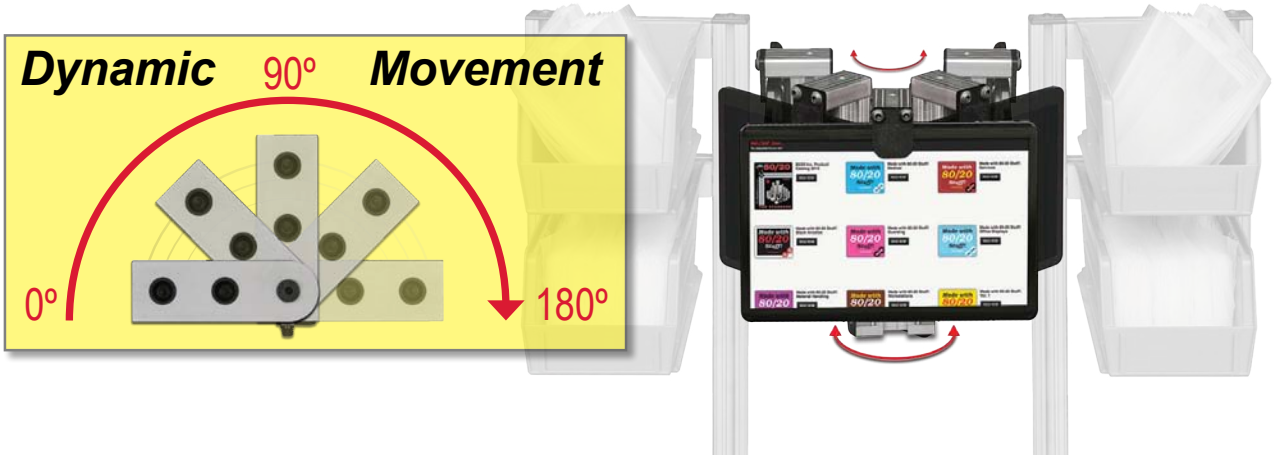
These are easily integrated into existing structures and are commonly used in applications such as automation equipment or guards that require frequent movement.





80/20 BUILD YOUR IDEA
More on 80/20® products available at 8020.net

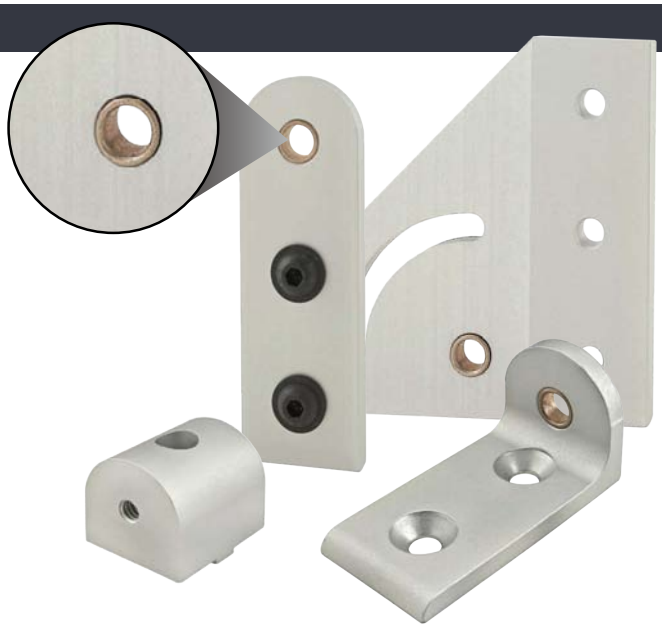
Axial Motion: 0° to 180°



Dynamic pivots are typically used to create axial motion ranging from 0-180 degrees. There are also assemblies available to limit the range of motion from 0-90 degrees. You'll commonly find dynamic pivots in tooling arms, displays and computer stands.

Dynamic Pivots Components

Dynamic pivot assemblies include a pivot nub and connect to the profile using either "L" arms, straight arms, or brackets. These arms have permanently lubricated bronze bushings that act as a high-strength pivot point and reduce maintenance time and cost.



All dynamic arms and brackets come with permanently lubricated bronze bushings for long-lasting and repeated movement.

If you will be repositioning your dynamic pivot frequently, consider adding a handle to help simplify and speed up the process. Dynamic pivots are long-lasting and there are a variety of assembly combinations available that allow you to fold or rotate the profiles to fit your specific needs.

Bearings & Pivots

3 Slot Mount - Single Flange Short Standard Linear Bearing

- Available with or without brake holes
- Includes pads, screws and shims; pads are self lubricating UHMW
- Designed for compression loads only; not intended for hanging loads

Bearings & Pivots

3 Slot Mount - Single Flange Long High-Cycle Linear Bearing

- Pads capable of withstanding repetitive cycles with sudden acceleration and deceleration
- Includes pads, screws and shims; pads are self lubricating UHMW
- Designed for compression loads only; not intended for hanging loads

Bearings & Pivots

4 Slot Mount - Double Flange Long High-Cycle Linear Bearing

- Pads capable of withstanding repetitive cycles with sudden acceleration and deceleration
- Includes pads, screws and shims; pads are self lubricating UHMW
- Designed for compression loads only; not intended for hanging loads

Engineering Specifications on UHMW-PE Bearing Pads

Property	Test Method	Unit	Typical Value
Specific Gravity	ASTM D-792	g/cm3	0.94
Yield Strength @ 73°F	ASTM D-638	p.s.i.	3400
Ultimate Tensile Strength @ 73°F	ASTM D-638	p.s.i.	6800
Break Elongation @ 73°F	ASTM D-638	%	450
Yield Strength @ 250°F	Stress Strain Diagram	p.s.i.	700
Ultimate Tensile Strength @ 250°F	Stress Strain Diagram	p.s.i.	3300
Break Elongation @ 250°F	Stress Strain Diagram	%	900
Hardness - Rockwell "R" Scale	ASTM D-785	-	64
- Shore "D" Scale	ASTM D-2240	-	67
Flexural Modulus of Elasticity	Bend Creep/1 min. value	p.s.i.	110,000
Shear Strength	ASTM D-732	p.s.i.	3500
Izod Impact @ + 23°C	ASTM D-256A	ft-lbs/in. notch	No break
@ - 140° C	ASTM D-256A	ft-lbs/in. notch	No break
Environmental Stress Cracking @ F50	ASTM D-1693 Mod	hrs.	6000
Water Absorption	ASTM D-570	-	NIL

Abrasive Resistance - Sand Slurry Test

- **Each material listed below was rotated 24 hours @ 1750 r.p.m.**
- **Carbon Steel = abrasive rating of 100.**
- **The weight loss for each material is relative to 100.**
- **The lower the figure, the better the abrasive resistance.**
- **50-50 sand/water slurry.**

Material	Rating
UHMW-PE	15
Nylon	31
High MW polyethylene	44
TFE	72
Stainless steel	84
Polypropylene	87
Polycarbonate	96
Hi carbon steel	100
Polyacetal	110
TFE/glass fiber	113
Normal MW polyethylene	125
Phosphor bronze	193
Yellow brass	409
Phenolic laminate	571
Hickory wood	967

Coefficient of Friction

UHMW-PE polymer has a lower coefficient of friction than glass. Its self-lubricating characteristics make it an ideal material for bearings, bushings, valves, wear strips, or any application where sliding contact is encountered.

Materials	Static	Kinetic	Test Method
Aluminum* vs. UHMW-PE	0.12	0.016	ASTM D-1894
Mild Steel vs. Mild Steel	0.30 - 0.40	0.25 - 0.35	
Mild Steel vs. UHMW-PE	0.15 - 0.20	0.12 - 0.20	
UHMW-PE vs. UHMW-PE	0.20 - 0.30	0.20 - 0.30	

*Anodized 204 R1 Spec on extruded aluminum

Comparison of Dynamic Coefficient of Friction on Polished Steel

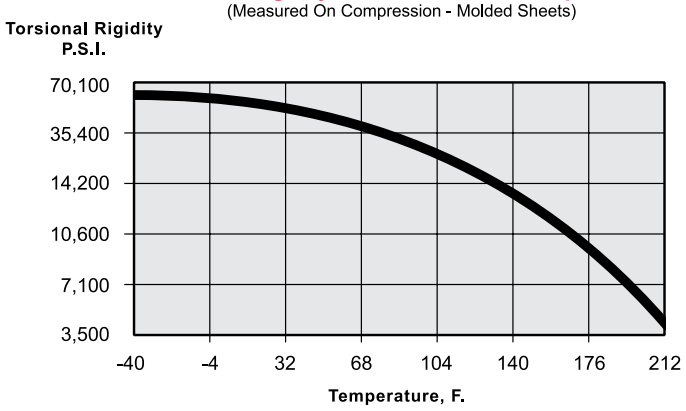
Property	UHMW-PE
Dry	0.10 - 0.22
Water	0.05 - 0.10
Oil	0.05 - 0.08

FDA and USDA Approved

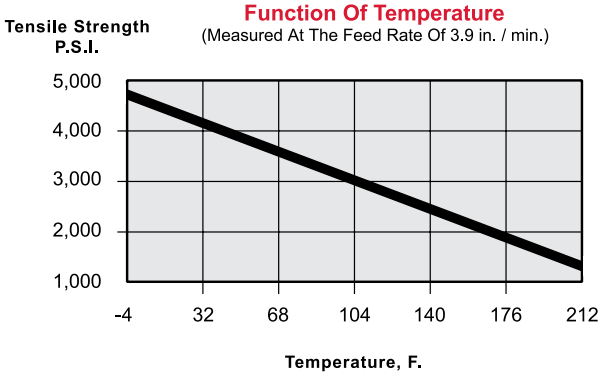
Bearings & Pivots

Load Bearing Properties of UHMW-PE

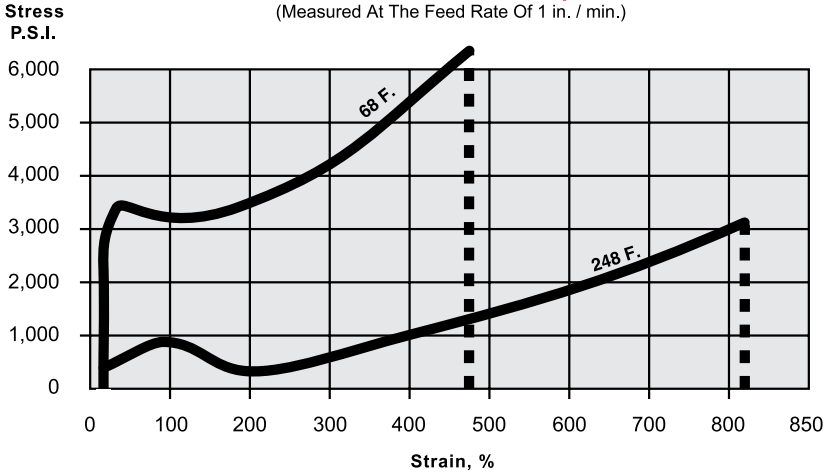
Torsional Rigidity As A Function Of Temperature
(Measured On Compression - Molded Sheets)



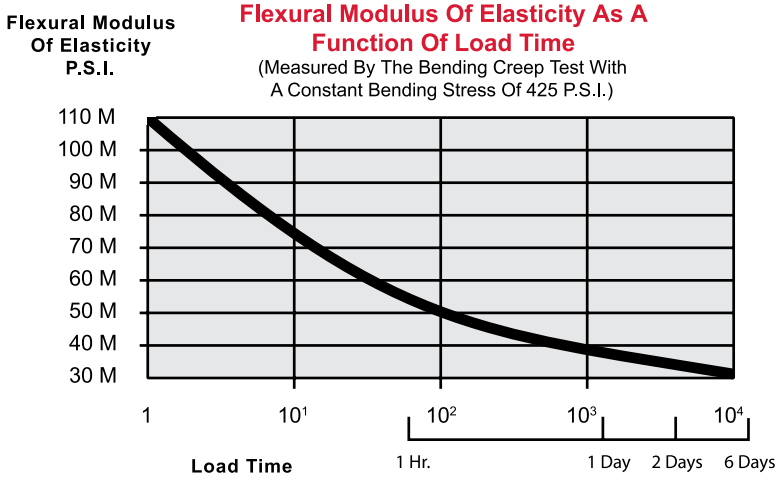
Tensile Strength At The Yield Point As A Function Of Temperature
(Measured At The Feed Rate Of 3.9 in. / min.)



Stress - Strain At Various Temperatures
(Measured At The Feed Rate Of 1 in. / min.)



Flexural Modulus Of Elasticity As A Function Of Load Time
(Measured By The Bending Creep Test With A Constant Bending Stress Of 425 P.S.I.)



80/20 BUILD YOUR IDEA

Cut to Length	Bearing Pad Profile	10-2

Bearings & Pivots

Double-Keyed Standard Bearing Pad Profile

- Profile can be cut to desired length
- Low coefficient of friction
- Cut-to-length machining service (pg. 10-2)

Linear Bearing Shim Stock

- Used to create a precise fit in linear bearings
- By loosening the bearing pad, shim(s) slide between pad and housing
- Sold in packs of 10

Universal Dynamic Right Angle Pivot Nub

- No machining required
- Parallel or perpendicular to mounting profile
- Creates full axial motion ranging from 0-90 degrees
- Hardware to mount nub to profile included

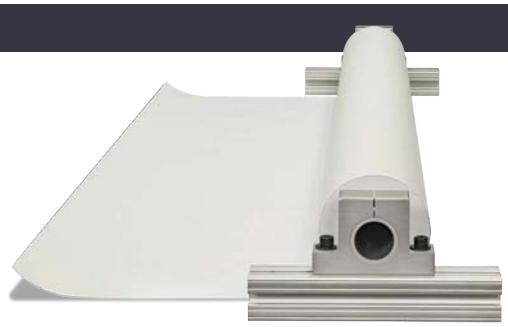
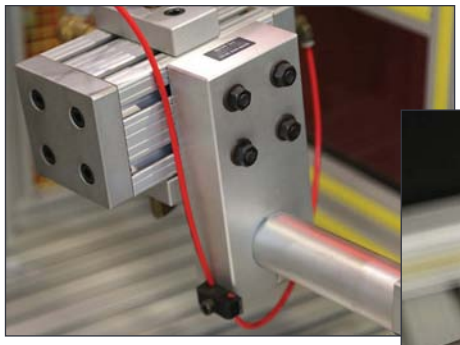
Introduction to Stanchions

Stanchions are typically used with 80/20 aluminum tubes to create an additional axis. Stanchions are a more permanent, precise, and stable base than alternatives, such as clamps.





There are different bases to choose from that allow you to add vertical or horizontal axes or a combination of the two. You also have options that support two axes using just one base or even the ability to create an off-set axis.

You will also want to consider adding a handle to your stanchion block; they enable flexibility in positioning and easy repositioning if you will be moving the tube frequently.

Stanchions

Single Shaft Stanchion Base

- Used with aluminum tube profile (pg. 9-5); tube connects perpendicular to mounted base
- Clearance channel for running wires or cables
- Clamp screws included

Finishing Touches

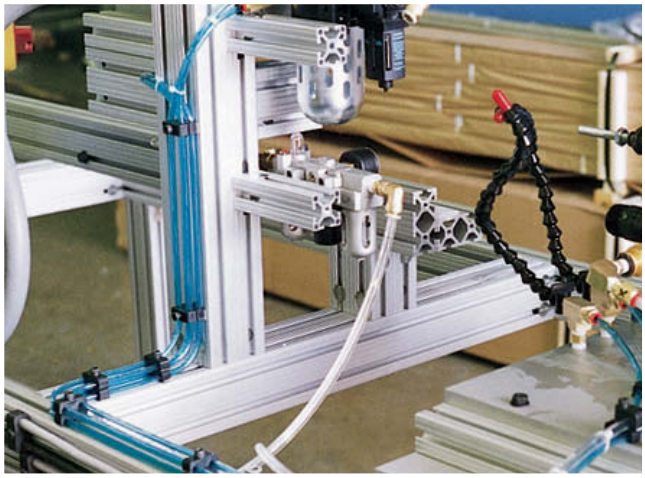
80/20 accessories pull together your project and give it the finishing touches to make it fit your exact specifications. There are a wide variety of options; from storage and organization to wire and tube management, you'll find what you need to enhance and personalize your project.



When adding accessories, it's helpful to consider a few overall categories:

- Protection
- Wire & Cable Management
- Storage and Organization

Keep in Mind
Some products can be used in multiple categories. For instance, T-slot covers provide protection from debris buildup and can also be used to manage wires and cables recessed within the T-slot.

Protection

Accessories in this category are used for a range of purposes from protecting people and equipment from sharp edges and damage to keeping dust out of T- slots. Some of the products, such as T-slot covers and end caps, also add a finishing look to your project.

- End caps
- T-slot covers
- Tread strip
- Anodize breaker
- Grounding terminal
- Rubber bumper

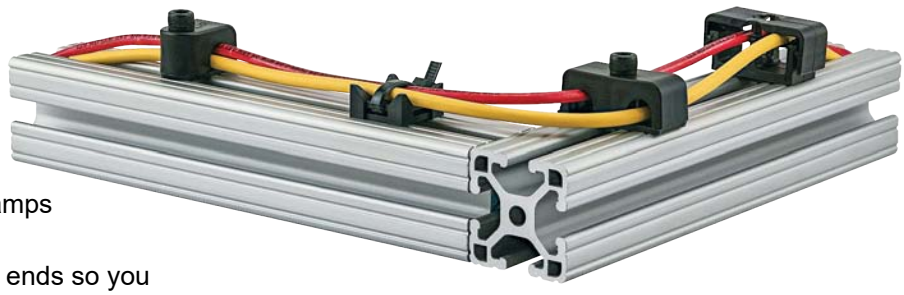
Tip: Try aluminum T-slot covers to blend in with your profile or use colors to stand out and denote caution or warning.

Accessories

Wire and Cable Management

Wire and cable management products improve safety by keeping your application clean, protected and organized. These products decrease the possibility of damage to wires, cables and tubes and can be quickly and easily installed into any project. The variety of options provides flexibility in design and implementation.

- Wiring duct
- Wire housing & covers
- Cable tie mounting pad
- Cable and tube clip
- Cable tie mounting block
- Single and double tube clamps



Tip: Wiring duct has interlocking ends so you can make the duct any customized length.

Storage & Organization

Storage and organization accessories come in a range of colors and sizes to accommodate your processes. Keep clutter at bay and streamline operations by incorporating these products into your application.

- Storage bins
- Slide-in tool hanger
- Mounting hooks
- Tool hanger spring hook
- Light-duty adhesive clamp
- Tool & Cup Holders
- Label holder

Important Note: Storage bins are mounted to a T-slot profile using storage bin hangers (see page 8-32).

That's Not All
Be sure to browse through all of the products to find everything you need to finish your project.

Accessories

Hand Crank Lift System

- Included in kit: hydraulic pump with hand crank (1), linear leg units (4), rubber leveling feet (4), mounting brackets (8), M5 x 8mm bolts (16)
- Kit ships in one box weighing 29 lbs and measuring 35” x 12” x 9” in size

See the lift system in action. Scan the QR code to see a demonstration

Material Specifications

- Works with 15, 30, 40, 45 series profiles
- Made up of primarily aluminum, plastic and stainless steel
- Max load: 450 kg (992 lbs) – includes weight of frame
- Max stroke: 300mm (11.811”)
- Lifting speed: 5mm (.197”) per hand crank turn
- Retracted height of legs: 445mm (17.520”)
- Extended height of legs: 745mm (29.331”)

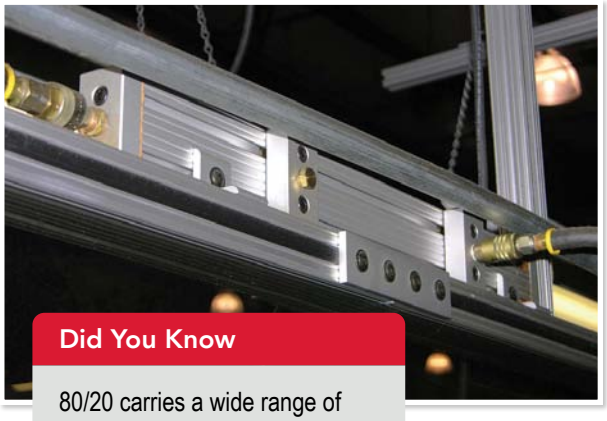
Introduction to Pressure Manifolds

Manifolds are used to add a pressurized substance, such as liquids or air, into the center cavity of a T-slot profile. You'll commonly find this in material handling processes, such as work and assembly stations, because the pressurized profile allows you to incorporate pneumatic tools directly into the work area.

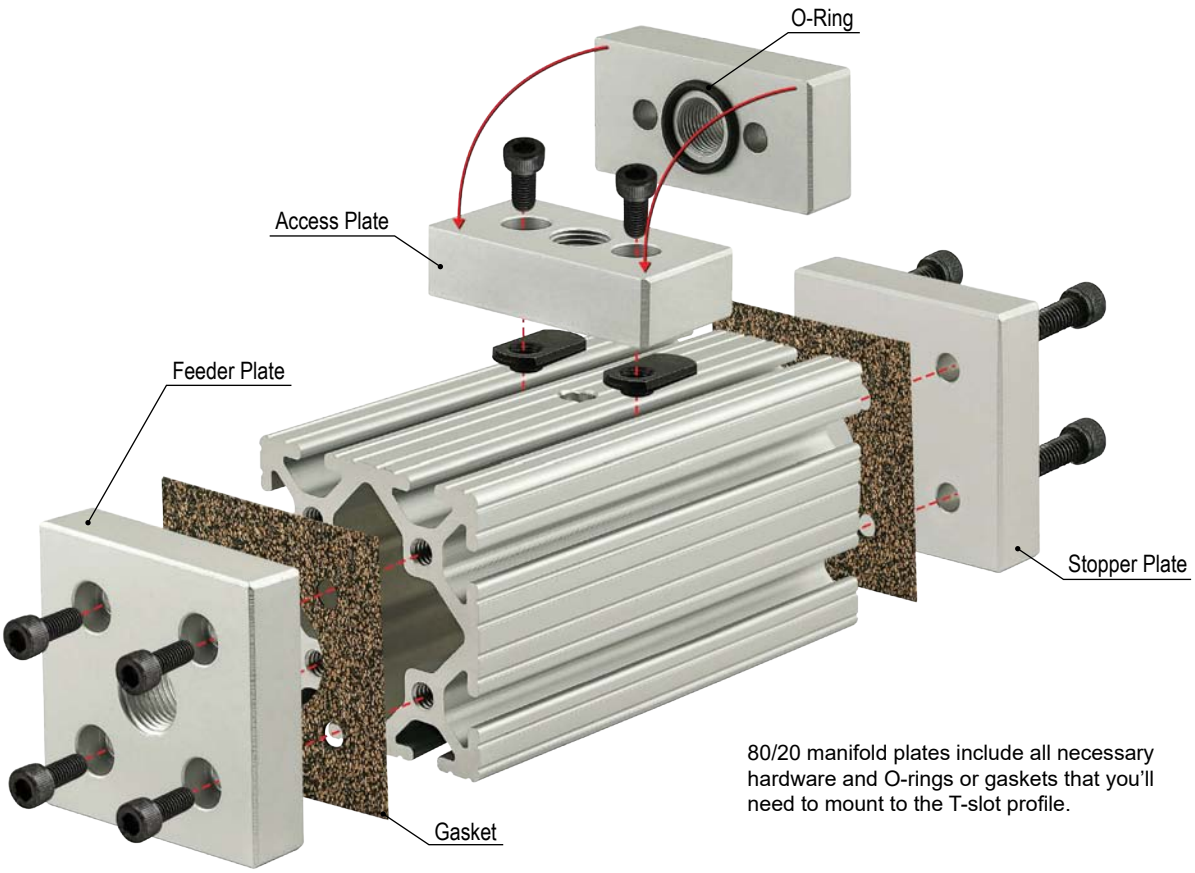
There are a range of access, feed, and stopper plates available to fit your structure.

As an example, a manifold configuration could include an access plate attached to the supply line and feed plate mounted where the pressurized substance is released. The stopper plate secures to the profile end to form a tight seal.



Did You Know

80/20 carries a wide range of structural shapes that allow you to design a customized manifold.



80/20 manifold plates include all necessary hardware and O-rings or gaskets that you'll need to mount to the T-slot profile.

Accessories

3-Hole Pressure Manifold Feed Plate

- Includes tapped hole; mounts to profile end for sealed connection where substance is released
- Mounting hardware and gasket included
- Maximum allowable pressure is 150 psi (1034.21 kPa)

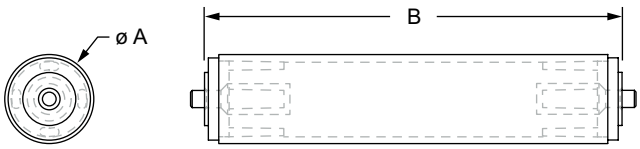
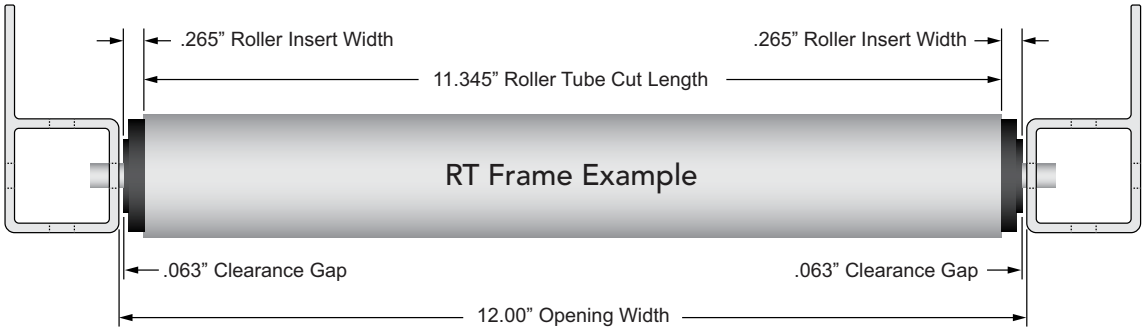
Gravity Roller

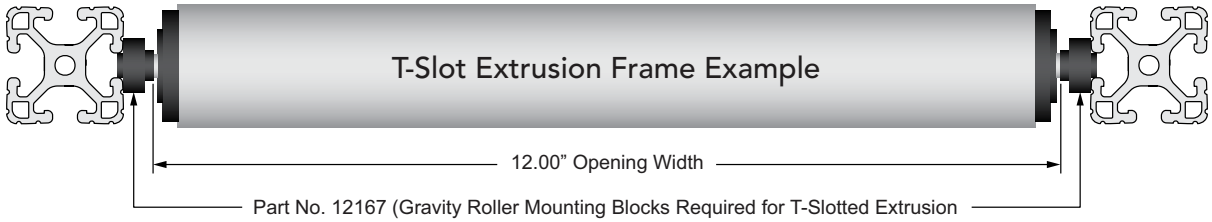
- Used with Ready Tube or gravity roller mounting blocks (8-60)
- Spring-loaded pins snap easily into holes



Part No.	Series	Material	Process	Finish	A	B	Weight
9840	15 40 45 RT	Aluminum / Plastic	Assembled	Clear Anodize	1.625"	11.815"	1.065 lb
9841						13.315"	1.153 lb
9842						14.815"	1.241 lb
9843						16.315"	1.330 lb
9844						17.815"	1.418 lb
9845						19.315"	1.506 lb
9846						20.815"	1.595 lb
9847						22.305"	1.683 lb
9848						23.815"	1.772 lb

Custom Gravity Roller





How to Calculate a Custom Gravity Tube Length
12.00" - .063" - .063" - .265" - .265" = 11.345" Tube Length

How to Order a Custom Ready Tube Gravity Roller	
Part No.	Description
9740	Gravity Roller Tube
7212	Cut to Length for 9740 Gravity Roller Tube
7165*	Roller Inserts and Gravity Roller Assembly Service

*Only used on 4.00" to 27.00" tubes.

Accessories

Gravity Roller Mounting Block

- Used with gravity rollers (8-59); block secures in T-slot (see suggested hardware)
- Roller pin snaps in and out of the block

Cut-to-Length Any Structural Shape

All structural shapes can be cut-to-length. Machining service used is based on overall structural shape size. See page 10-2 for cut-to-length options.

Structural Shapes for Custom Parts

Structural shapes are commonly used for custom projects; if there's a unique flat plate, manifold, bearing, or bracket you need, we have the material in stock to make it for you.

From solid aluminum plates, deadbolt latches, angle profiles, or panel mount blocks, this wide selection of in-house shapes provides a quick turn time for your design.

80/20 also provides an in-house Custom Machining service to modify any of our structural shapes to fit your requirements. This gives you access to a high-precision, large capacity machine shop to customize your parts quickly and accurately.

Machining Services

Profile Miter Cut

- T-slotted profiles can be miter cut to angles of 0 to 75 degrees or 0 to 60 degrees for select profiles (with the exception of 3060 and 40-8016, which can only be cut to an angle of 45 degrees across the 6.00” (160mm) side
- When ordering, designate profile end (left, right, or both) that requires miter; A drawing is required with this machining service; for project design assistance contact a Design Technician at www.8020.net

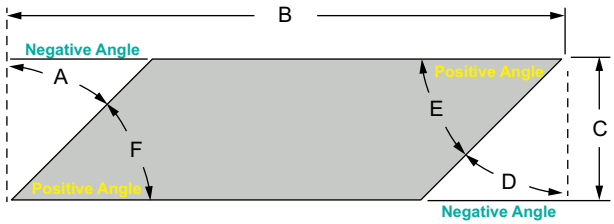
Profile Miter Cut Worksheet

All T-slotted profiles may have miter cuts from 0º to 60 or 75º, EXCEPT for 3060 which can only be cut along the long side at 0º to 45º and 40-8016 which can only be cut along the long side at 0º to 45º. Example shown below:



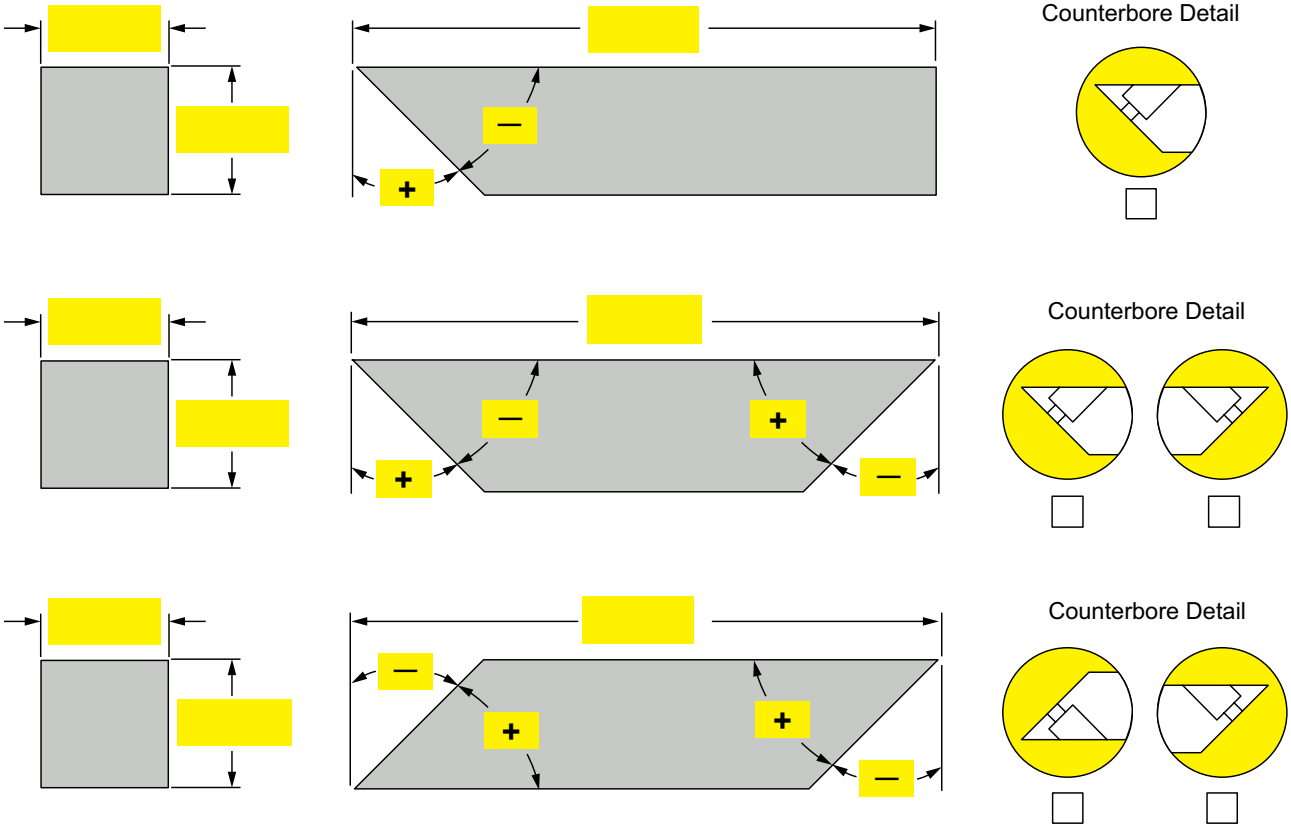
Example:
The following fields are required to complete a custom profile miter cut.

A = -30º **B** = 43.18" or 450mm **C** = 3.00" or 80mm
D = -45º **E** = 45º **F** = 60º

AutoQuoterX® II always indicates material removed from the profile. (See dimension reference A and D)

Note: Structural shape maximum angle is dependent on profile size

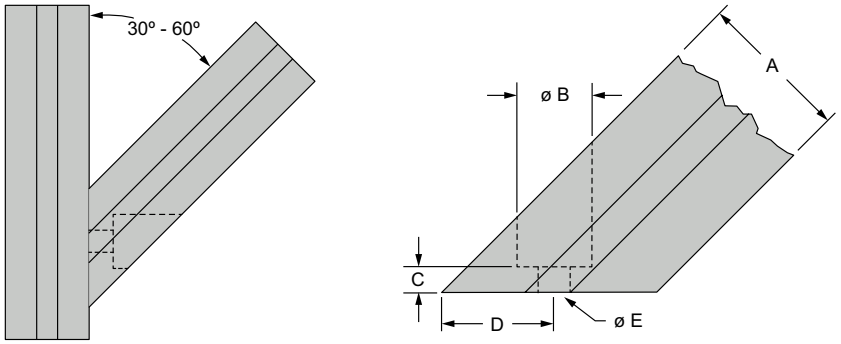
Predetermined Style Drill Thru & Counterbore



Machining Services

Miter Cut Counterbore

- Includes drill through and counterbore to create custom supports with angles ranging from 30 to 60 degrees; service is for one end of profile with included mounting hardware
- When ordering, designate profile end (left, right, or both) that requires miter



Part No.	Series	Applicable Profiles	A	B	C	D*	E

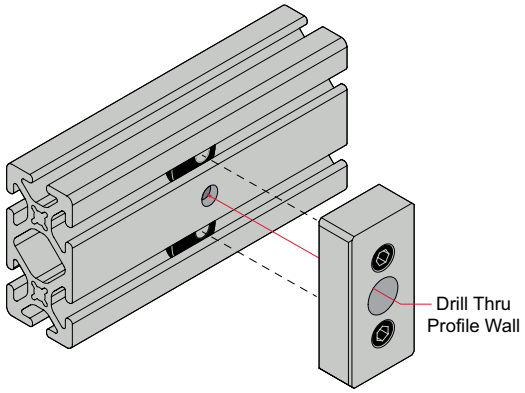
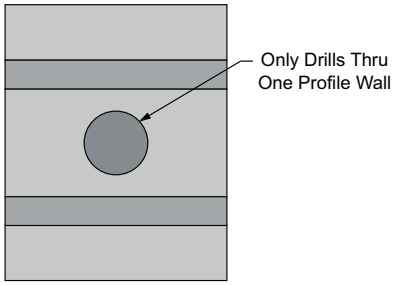
Manifold Access Profile Milling

- Required for pressure manifolds (pg. 8-56); consists of drill through one wall of profile to access center cavity
- When ordering, designate distance from left end of profile; reference hole location by specifying “between” T-slot designations

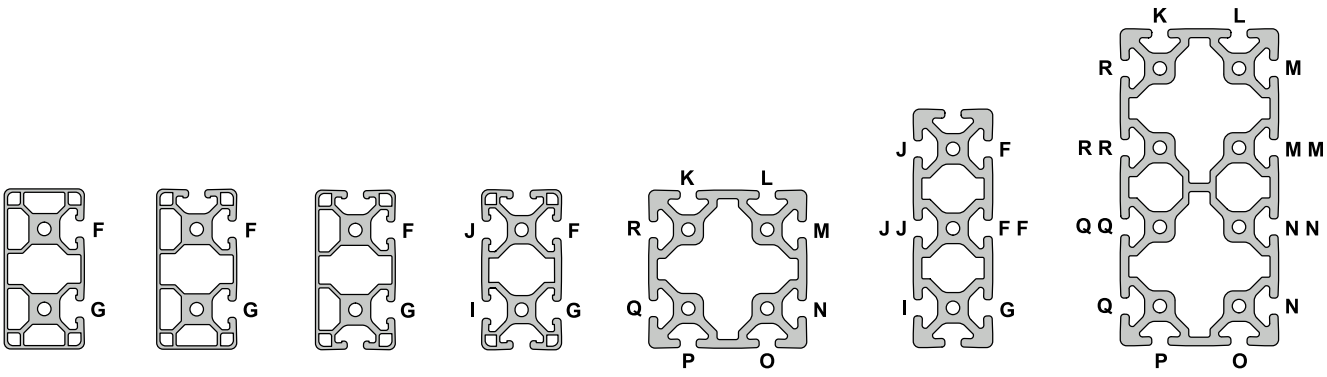




Part No.	Series	Service Type	Hole Diameter
7062	10	Drill Thru One Profile Wall	.327”
7068	15		.374”
25-7062	25		8.30mm
40-7068	40		9.50mm

Ordering Example: 1530: (1) @48.25” w/ #7068 btwn F and G @ 12.00” and 36.25” from left end.

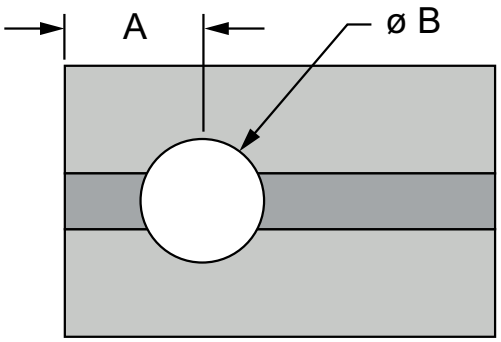
Manifold Access Drill Thru Designations



Machining Services

Bolt Connector Profile Milling

- Required when using the bolt connector (pg. 3-23);
- When ordering, designate profile end (left, right or both) and T-slot for clearance hole



Part No.	Series	Service Type	Bolt Connector	A	B
30-7034	30	30 Series Profile Milling for Bolt Connector (30.00mm only)	13189	16.50mm	8.30mm
45-7034	45	45 Series Profile Milling for Bolt Connector (45.00mm)	13190	23.70mm	17.37mm
45-7037	45	45 Series Profile Milling for Bolt Connector (90.00mm)	13192	23.70mm	17.37mm

Ordering Example: (2) 45-4590 x 908.0mm w/45-7037 in slot R both ends.

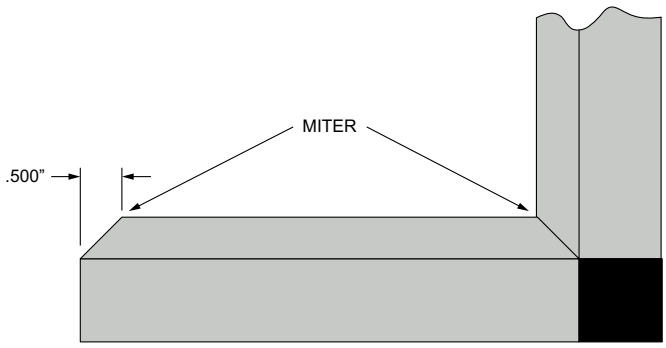
45 Degree Flange Milling

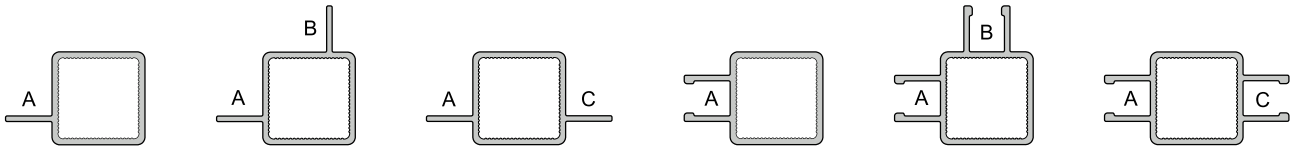
- Allows two Quick Frame profile flanges to intersect at 90 degrees
- Service is for both ends of profile; if one end is desired, specify left or right end and include drawing



Part No.	Series	Service Type
7300	QF	45 Degree Flange Milling Service for Quick Frame Location A, B or C only
7301	QF	45 Degree Flange Milling Service for Quick Frame Location A and B
7302	QF	45 Degree Flange Milling Service for Quick Frame Location A and C

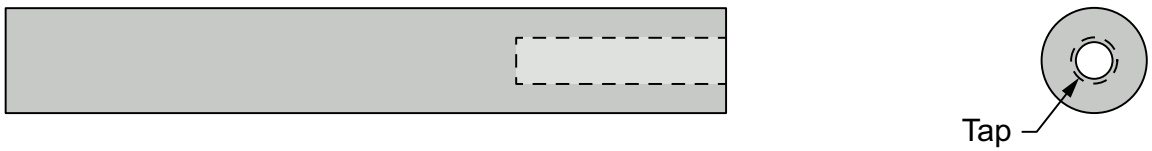
Ordering Example: (2) #9010 x 22.00" w/ #7300 on A per drawing.

45 Degree Flange Machining Designations



Connector Rod End Tap

- Adds threads to end of connector rod (pg. 8-61)
- When ordering, designate profile end (left, right, or both) that requires tap



Part No.	Series	Tap Size (Min. Depth)	Taps Per End	Profile Part No.
7105	F RT	5/16-18 (1.25")	1	9820
7106	F RT	M8 x 1.25" (31.75mm)

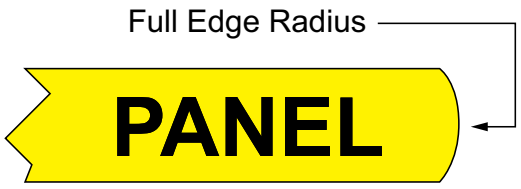
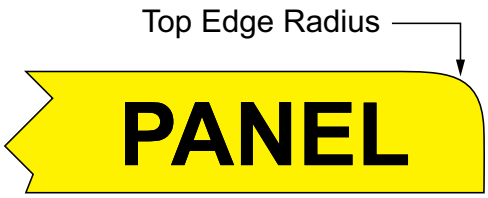
Edge Radius

- Both edges rounded - the radius will be equal to the panel thickness; One edge rounded - radius will equal to half the panel thickness with a minimum panel thickness of .118” (3.00mm)
- Less than all four sides requires drawing designating which sides receive the edge radius service





Full Edge Radius

Panels Part No.	Aluminum Part No.	Series	Service Type	Radius Tolerance
7500	7221	F	Full Edge Radius Plastic Panel or Aluminum Plate **ALL** Sides Less Than Or Equal To 48”	+/- .040”
7501	7222	F	Full Edge Radius Plastic Panel or Aluminum Plate **ANY** Side Greater Than 48”	
65-7500	65-7221	M	Full Edge Radius Plastic Panel or Aluminum Plate **ALL** Sides Less Than Or Equal To 1220mm	+/- 1.02mm
65-7501	65-7222	M	Full Edge Radius Plastic Panel or Aluminum Plate **ANY** Side Greater Than 1220mm	

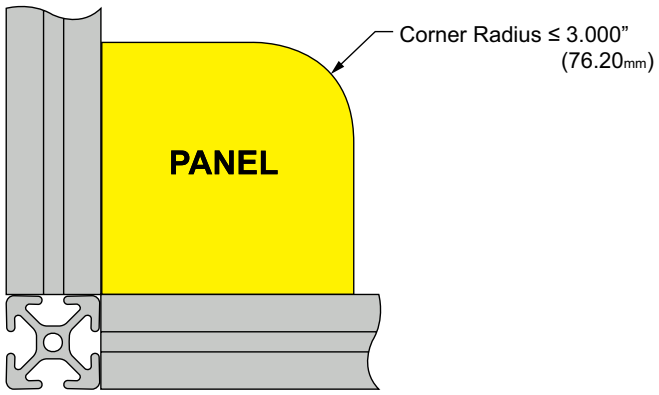
*Minimum Panel Thickness is .118” (3.00mm). Maximum Panel Thickness is .500” (12.7mm).

Top Edge Radius

Panels Part No.	Aluminum Part No.	Series	Service Type	Radius Tolerance
7540	7542	F	Top Edge Radius Plastic Panel or Aluminum Plate **ALL** Sides Less Than Or Equal To 48”	+/- .040”
7541	7543	F	Top Edge Radius Plastic Panel or Aluminum Plate **ANY** Side Greater Than 48”	
65-7540	65-7542	M	Top Edge Radius Plastic Panel or Aluminum Plate **ALL** Sides Less Than Or Equal To 1220mm	+/- 1.02mm
65-7541	65-7543	M	Top Edge Radius Plastic Panel or Aluminum Plate **ANY** Side Greater Than 1220mm	

*Minimum Panel Thickness is .118” (3.00mm). Maximum Panel Thickness is .750” (19.05mm).

Corner Radius

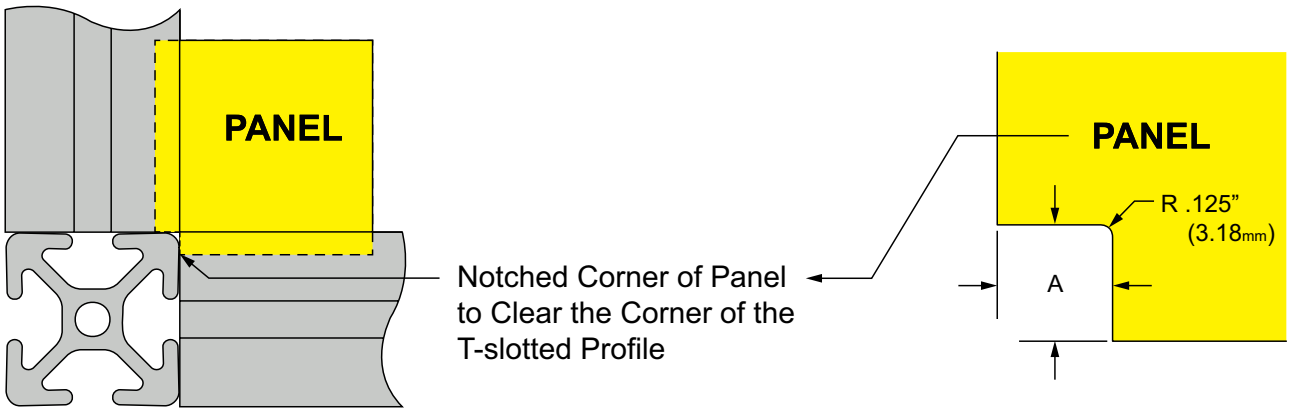


Panel Part No.	Aluminum Part No.	Series	Service Type	Tolerance
7179	7176	F	Corner Radius Plastic Panel or Aluminum Plate **RADIUS** ≤ 3.000” **Up To** .250” Thick	+/- .060”
7187	7195	F	Corner Radius Plastic Panel or Aluminum Plate **RADIUS** ≤ 3.000” **Thicker Than** .250”	
65-7179	65-7176	M	Corner Radius Plastic Panel or Aluminum Plate **RADIUS** ≤ 76.20mm **Up To** 6mm Thick	+/- 1.52mm
65-7187	65-7195	M	Corner Radius Plastic Panel or Aluminum Plate **RADIUS** ≤ 76.20mm **Thicker Than** 6mm	

Machining Services

Profile Corner Clearance Notch

- Used to clear profile corner for perpendicularly mounted T-slot profiles when panel mounts inside T-slot
- Works with mesh, plastic panels, and aluminum up to .250" (6.35mm) thick



Panel & Wire Part No.	Aluminum Part No.	Series	Service Type	A	Cut Tolerance
7504	7202	10	Corner Notch	.312"	+/- .060"
7505	7203	15		.440"	
20-7504	20-7202	20		6.00mm	+/- 1.52mm
25-7504	25-7202	25		7.90mm	
30-7505	30-7203	30		9.00mm	
40-7505	40-7203	40		11.20mm	
45-7506	---	45		14.00mm	

Ordering Example:
2609 (1) @ (AD) 18.000" x (AB) 18.000"
w/ 7505 Horizontal on Corner B

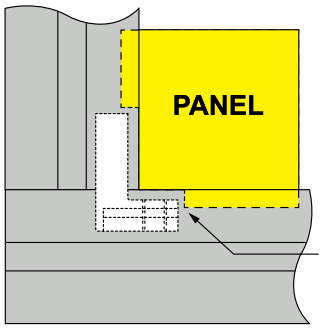
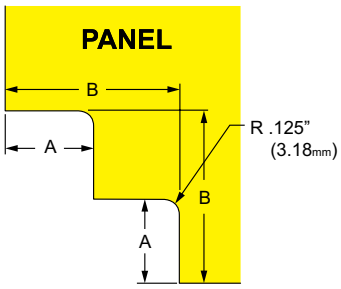
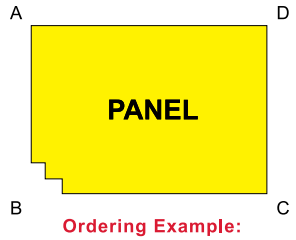
Hidden Corner Connector Clearance Notch

- Used to clear hidden corner connector (pg. 3-19) when a panel mounts inside T-slot; two styles available
- When ordering, specify a vertical or horizontal orientation

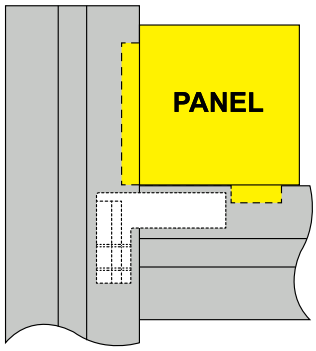


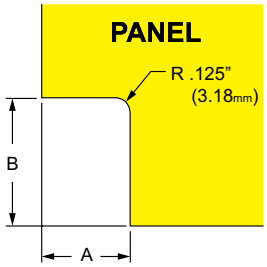


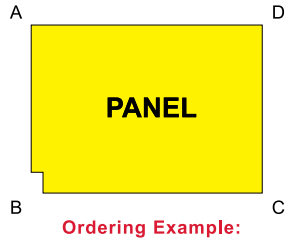


Ordering Example:
2609 (1) @ (AD) 22.000" x (AB) 18.000"
w/ 7522 on Corner B

Inside to Inside: 7422, 7522, 25-7422, 30-7522, 40-7522, 45-7522







Ordering Example:
2609 (1) @ (AD) 18.000" x (AB) 21.000"
w/ 7523 Vertical on Corner B

Inside to Outside: 7423, 7523, 25-7423 30-7523, 40-7523, 45-7523

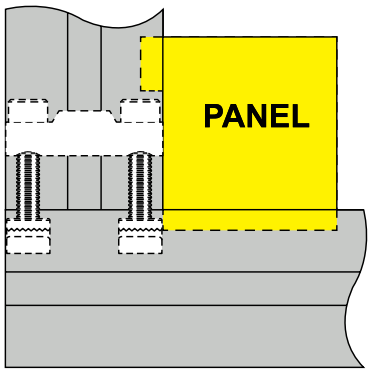
Panel & Wire Part No.	Series	Service Type	Connector Part No.	A	B	Cut Tolerance
7422	10	Corner Notch for Inside to Inside Hidden Connector	33440	.315"	1.063"	+/- .060"
7423	10	Corner Notch for Inside to Outside Hidden Connector	33460	.315"	1.063"	
7522	15	Corner Notch for Inside to Inside Hidden Connector	33450	.405"	1.263"	
7523	15	Corner Notch for Inside to Outside Hidden Connector	33470	.405"	1.263"	
25-7422	25	Corner Notch for Inside to Inside Hidden Connector	33440	8.00mm	27.00mm	+/- 1.52mm
25-7423	25	Corner Notch for Inside to Outside Hidden Connector	33460	8.00mm	27.00mm	
30-7522	30	Corner Notch for Inside to Inside Hidden Connector	33450	8.25mm	30.04mm	
30-7523	30	Corner Notch for Inside to Outside Hidden Connector	33470	8.25mm	30.04mm	
40-7522	40	Corner Notch for Inside to Inside Hidden Connector	33450	11.76mm	33.55mm	
40-7523	40	Corner Notch for Inside to Outside Hidden Connector	33470	11.76mm	33.55mm	
45-7522	45	Corner Notch for Inside to Inside Hidden Connector	33490	12.75mm	41.76mm	
45-7523	45	Corner Notch for Inside to Outside Hidden Connector	33530	12.75mm	41.76mm	

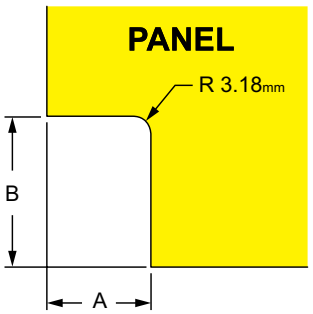
Machining Services

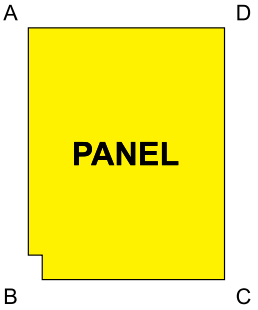
Bolt Connector / Plate Connector Clearance Notch

- Used to clear bolt connector (pg. 3-23) or plate connector (pg. 3-25) when a panel mounts inside T-slot
- Works with mesh and plastic panels up to 6mm thick
- When ordering, specify a vertical or horizontal orientation

Bolt Connector Clearance Notch



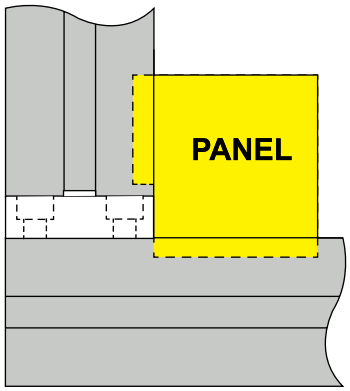


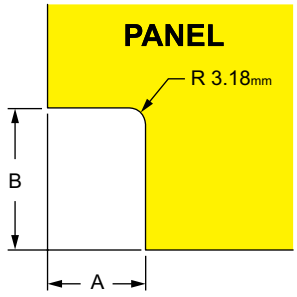


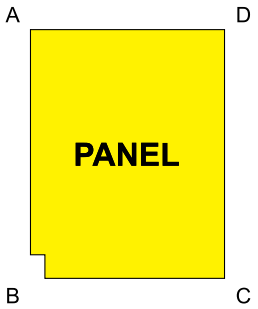
Ordering Example:
65-2609 (1) @ (AD) 580.00mm x (AB) 720.00mm
w/ 30-7314 Vertical on Corner B

Panel & Wire Part No.	Series	Service Type	A	B	Cut Tolerance
30-7314	30	Corner Notch	11.00mm	30.00mm	+/- 1.52mm
45-7317	45		14.00mm	47.00mm	

Plate Connector Clearance Notch







Ordering Example:
65-2609 (1) @ (AD) 580.00mm x (AB) 720.00mm
w/ 45-7323 Horizontal on Corner B

Panel & Wire Part No.	Series	Service Type	A	B	Cut Tolerance
45-7323	45	Corner Notch	14.00mm	27.00mm	+/- 1.52mm

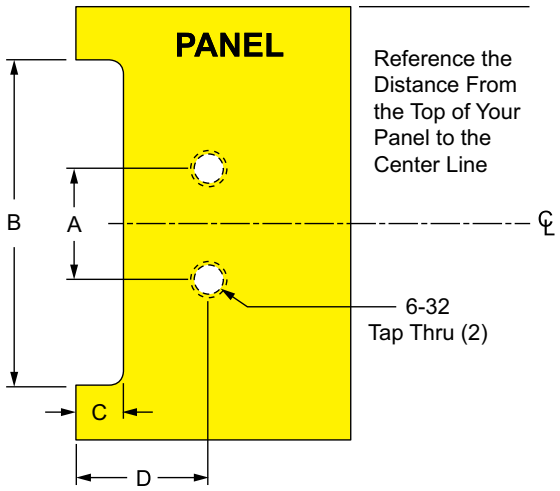
Grabber™ Door Catch / Locking Grabber™ Handle Panel Milling

- Used to add handle to a plastic panel or aluminum plate
- Provides clearance for the Grabber™ door catch (pg. 4-126) and quick installation of Locking Grabber™ Handle (pg. 4-116)

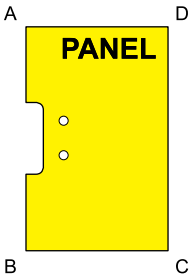
Grabber™ Door Catch Panel Milling



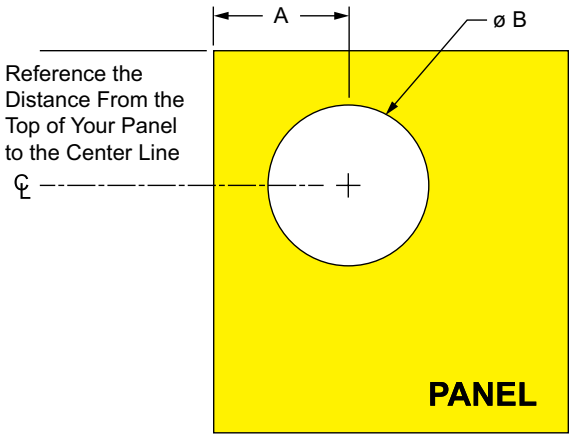
Part No.	Series	A	B	C	D	Cut Tolerance
7313	F	1.600"	4.750"	.313"	1.125"	+/- .020"
65-7313	M	40.60mm	120.70mm	8.00mm	28.60mm	+/- .50mm

Ordering Example:
2609 (1) @ (AD) 18.000" x (AB) 22.000"
w/ 7313 on Side AB @ 12.000"

(All machining center lines will be called out from point "A" on the panel)



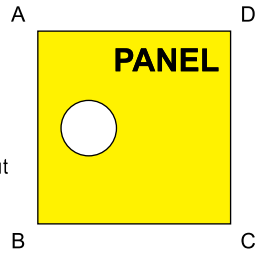
Locking Grabber™ Handle Panel Milling



Part No.	Series	A	B	Hole Location Tolerance
7510	F	2.000"	2.000"	+/- .010"
65-7510	M	50.80mm	50.80mm	+/- .25mm

Ordering Example:
2609 (1) @ (AD) 18.000" x (AB) 18.000"
w/ 7510 on Side AB @ 9.000"

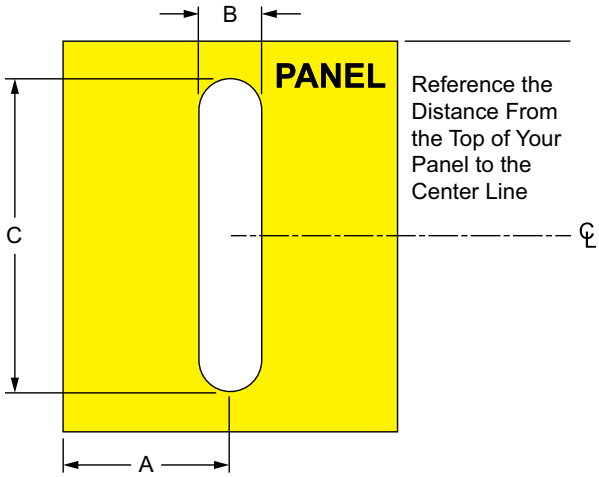
(All machining center lines will be called out from point "A" on the panel)



Machining Services

Flush Handle Plastic Panel Milling

- Used with plastic panels to provide slot for quick installation of flush plastic panel handle (pg. 4-114)



Part No.	Series	Handle Part No.	A	B	C	Hole Location Tolerance
7520	F	2056	2.000"	.625"	3.000"	+/- .010"
7521	F	2058	2.000"	.625"	4.125"	
65-7520	M	65-2056	50.80mm	15.88mm	76.20mm	+/- .25mm
65-7521	M	65-2058	50.80mm	15.88mm	104.78mm	

Ordering Example:
2609 (1) @ (AD) 18.000" x (AB) 20.000"
w/ 7520 side AB @ 10.000"

(All machining center lines will be called out from point "A" on the panel)

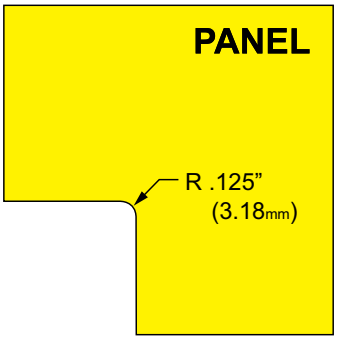
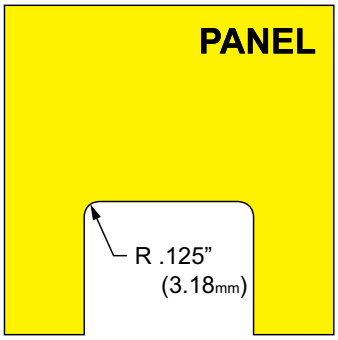
Plastic Panel / Aluminum Plate Cutout

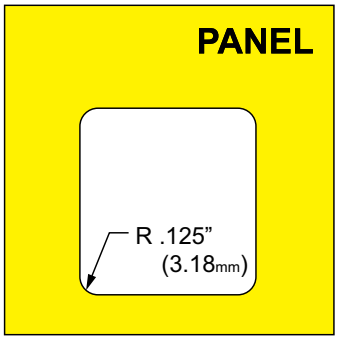
- Provides opening commonly used for adding a door or access point
- Drawing is required with this machining service; for project design assistance contact a Design Technician at www.8020.net



2 Sided Cutout



3 Sided Cutout



4 Sided Cutout

2 Sided Cutout

Panel Part No.	Aluminum Part No.	Series	Service Type	Cut Tolerance
7162	7171	F RT	2 Sided Cutout **ANY** Dimensions > 3.000" **Up To** .250" Thick	+/- .040"
7182	7190	F	2 Sided Cutout **ANY** Dimensions > 3.000" **Thicker Than** .250"	
65-7162	65-7171	M	2 Sided Cutout **ANY** Dimensions > 80mm **Up To** 6mm Thick	+/- 1.02mm
65-7182	65-7190	M	2 Sided Cutout **ANY** Dimensions > 80mm **Thicker Than** 6mm	

3 Sided Cutout

Panel Part No.	Aluminum Part No.	Series	Service Type	Cut Tolerance
7163	7172	F RT	3 Sided Cutout **ANY** Dimensions > 3.000" **Up To** .250" Thick	+/- .040"
7183	7191	F	3 Sided Cutout **ANY** Dimensions > 3.000" **Thicker Than** .250"	
65-7163	65-7172	M	3 Sided Cutout **ANY** Dimensions > 80mm **Up To** 6mm Thick	+/- 1.02mm
65-7183	65-7191	M	3 Sided Cutout **ANY** Dimensions > 80mm **Thicker Than** 6mm	

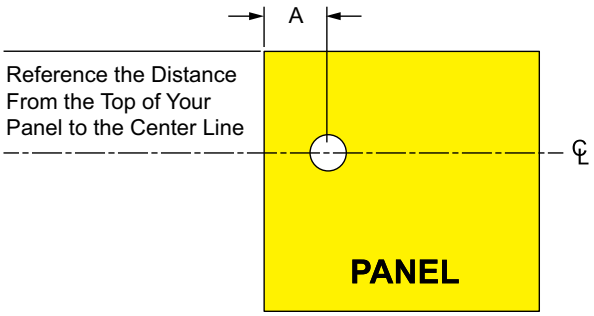
4 Sided Cutout

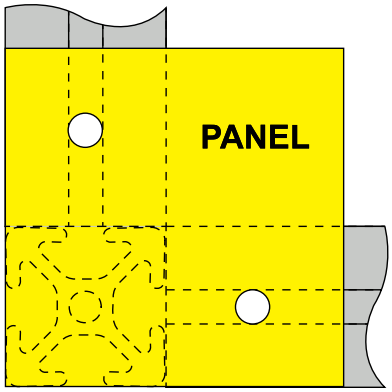
Panel Part No.	Aluminum Part No.	Series	Service Type	Cut Tolerance
7164	7173	F RT	4 Sided Cutout **ANY** Dimensions > 3.000" **Up To** .250" Thick	+/- .040"
7184	7192	F	4 Sided Cutout **ANY** Dimensions > 3.000" **Thicker Than** .250"	
65-7164	65-7173	M	4 Sided Cutout **ANY** Dimensions > 80mm **Up To** 6mm Thick	+/- 1.02mm
65-7184	65-7192	M	4 Sided Cutout **ANY** Dimensions > 80mm **Thicker Than** 6mm	

Machining Services

Top Mount Milling for Plastic Panel or Aluminum Plate

- Provides clearance to mount panel or plate to face of profile
- Thickness of panel or plate must be .250" (6mm) or thicker





Part No.	Series	Service Type	A	Hole Location Tolerance
7507	10	Drill Thru 0.281" Panel 1/2" from Edge	.500"	+/- .010"
7509	10	Drill Thru & Countersink for 1/4" FHSCS - 1/2" from Edge	.500"	
7508	15	Drill Thru 0.328" Panel 3/4" from Edge	.750"	
7511	15	Drill Thru & Countersink for 5/16" FHSCS - 3/4" from Edge	.750"	
7512	15	Drill Thru & Countersink for 1/4" FHSCS - 3/4" from Edge	.750"	
20-7507	20	Drill Thru 5.56mm Panel 10.00mm from Edge	10.00mm	+/- .25mm
20-7509	20	Drill Thru & Countersink for M5 FHSCS - 10.00mm from Edge	10.00mm	
25-7507	25	Drill Thru 7.14mm Panel 12.50mm from Edge	12.50mm	
25-7509	25	Drill Thru & Countersink for M6 FHSCS - 12.50mm from Edge	12.50mm	
30-7508	30	Drill Thru 8.33mm Panel 15.00mm from Edge	15.00mm	
30-7511	30	Drill Thru & Countersink for M8 FHSCS - 15.00mm from Edge	15.00mm	
30-7512	30	Drill Thru & Countersink for M6 FHSCS - 15.00mm from Edge	15.00mm	
40-7508	40	Drill Thru 8.33mm Panel 20.00mm from Edge	20.00mm	
40-7511	40	Drill Thru & Countersink for M8 FHSCS - 20.00mm from Edge	20.00mm	
40-7512	40	Drill Thru & Countersink for M6 FHSCS - 20.00mm from Edge	20.00mm	
45-7508	45	Drill Thru 8.33mm Panel 22.50mm from Edge	22.50mm	
45-7511	45	Drill Thru & Countersink for M8 FHSCS - 22.50mm from Edge	22.50mm	
45-7512	45	Drill Thru & Countersink for M6 FHSCS - 22.50mm from Edge	22.50mm	

Ordering Example:
2609 (1) @ (AD) 18.000" x (AB) 18.000"
w/ 7589 on Side AB @ 9.000"

(All machining center lines will be called out from point "A" on the panel)

Miscellaneous Panel Milling Services

Circular Cutout Plastic Panel or Aluminum Plate

Panel Part No.	Aluminum Part No.	Series	Service Type	Tolerance
7152	7175	F	Circular Cutout Plastic Panel or Aluminum Plate > 1.000" Not to Exceed 10" **Up To** .250" Thick	+/- .010"
7186	7194	F	Circular Cutout Plastic Panel or Aluminum Plate > 1.000" Not to Exceed 10" **Thicker Than** .250"	
65-7152	65-7175	M	Circular Cutout Plastic Panel or Aluminum Plate > 25mm Not to Exceed 250mm **Up To** 6mm Thick	+/- .25mm
65-7186	65-7194	M	Circular Cutout Plastic Panel or Aluminum Plate > 25mm Not to Exceed 250mm **Thicker Than** 6mm	

Drill Thru Plastic Panel or Aluminum Plate

Panel Part No.	Aluminum Part No.	Series	Service Type	Tolerance
7159	7180	F	Drill Thru Plastic Panel or Aluminum Plate **Up To** .250" Thick	+/- .010"
7200	7198	F	Drill Thru Plastic Panel or Aluminum Plate **Thicker Than** .250"	
65-7159	65-7180	M	Drill Thru Plastic Panel or Aluminum Plate **Up To** 6mm Thick	+/- .25mm
65-7200	65-7198	M	Drill Thru Plastic Panel or Aluminum Plate **Thicker Than** 6mm	

Drill Thru and Countersink Plastic Panel or Aluminum Plate

Panel Part No.	Aluminum Part No.	Series	Service Type	Tolerance
7156	7177	F	Drill Thru & Countersink Plastic Panel or Aluminum Plate **Up To** .250" Thick	+/- .010"
7188	7196	F	Drill Thru & Countersink Plastic Panel or Aluminum Plate **Thicker Than** .250"	
65-7156	65-7177	M	Drill Thru & Countersink Plastic Panel or Aluminum Plate **Up To** 6mm Thick	+/- .25mm
65-7188	65-7196	M	Drill Thru & Countersink Plastic Panel or Aluminum Plate **Thicker Than** 6mm	

Drill Thru and Tap Plastic Panel or Aluminum Plate

Panel Part No.	Aluminum Part No.	Series	Service Type	Tolerance
7158	7178	F	Drill Thru & Tap Plastic Panel or Aluminum Plate **Up To** .250" Thick	+/- .010"
7189	7197	F	Drill Thru & Tap Plastic Panel or Aluminum Plate **Thicker Than** .250"	
65-7158	65-7178	M	Drill Thru & Tap Plastic Panel or Aluminum Plate **Up To** 6mm Thick	+/- .25mm
65-7189	65-7197	M	Drill Thru & Tap Plastic Panel or Aluminum Plate **Thicker Than** 6mm	

Miter Cut Plastic Panel or Aluminum Plate

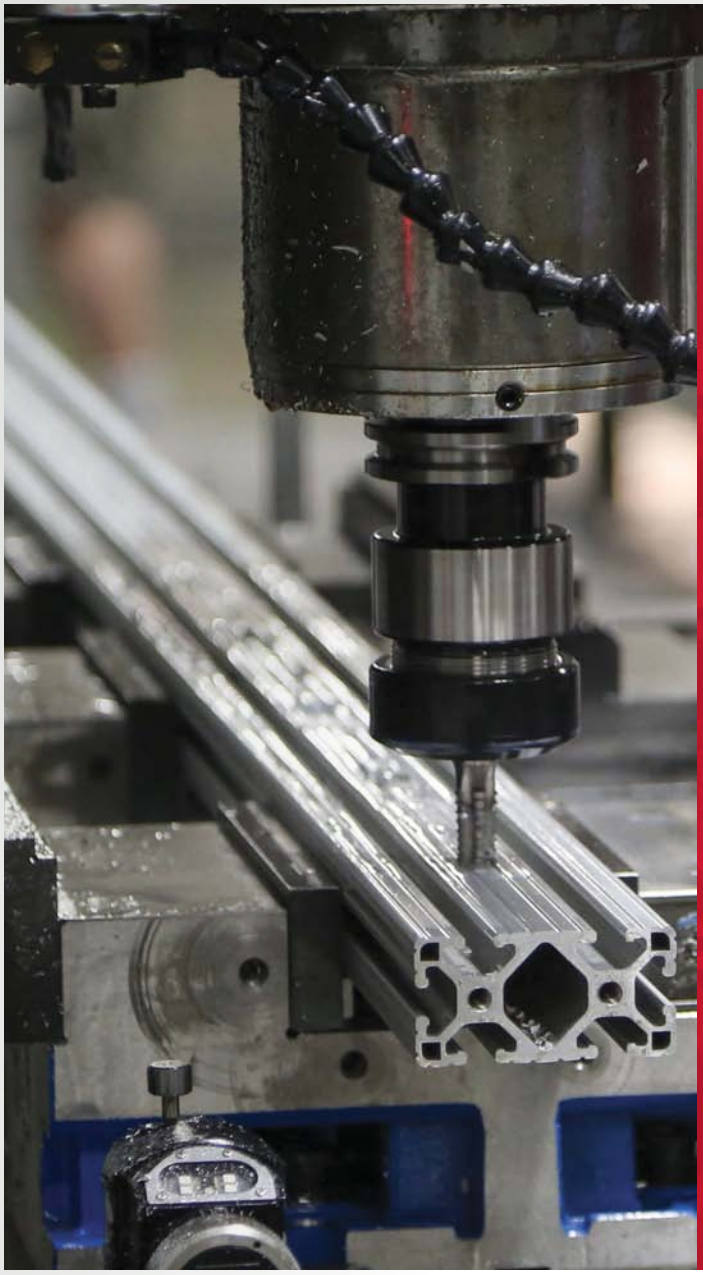
Panel Part No.	Aluminum Part No.	Series	Service Type	Tolerance
7157	7181	F	Miter Cut Plastic Panel or Aluminum Plate **Up To** .250" Thick	+/- .010"
7201	7199	F	Miter Cut Plastic Panel or Aluminum Plate **Thicker Than** .250"	
65-7157	65-7181	M	Miter Cut Plastic Panel or Aluminum Plate **Up To** 6mm Thick	+/- .25mm
65-7201	65-7199	M	Miter Cut Plastic Panel or Aluminum Plate **Thicker Than** 6mm	

Miscellaneous Plastic Panel or Aluminum Plate

Panel Part No.	Aluminum Part No.	Series	Service Type	Tolerance
7166	7174	F	Miscellaneous Plastic Panel or Aluminum Plate Notch **ALL** Dimensions ≤ 3.000" **Up To** .250" Thick	+/- .010"
7185	7193	F	Miscellaneous Plastic Panel or Aluminum Plate Notch **ALL** Dimensions ≤ 3.000" **Thicker Than** .250"	
65-7166	65-7174	M	Miscellaneous Plastic Panel or Aluminum Plate Notch **ALL** Dimensions ≤ 75mm **Up To** 6mm Thick	+/- .25mm
65-7185	65-7193	M	Miscellaneous Plastic Panel or Aluminum Plate Notch **ALL** Dimensions ≤ 75mm **Thicker Than** 6mm	

Mill Finish Sanding Aluminum Plate

Aluminum Part No.	Series	Service Type	Tolerance
7513	F	Mill Finish Sanding Aluminum Plate **ALL** Dimensions ≤ 48"	—
7514	F	Mill Finish Sanding Aluminum Plate **ANY** Dimensions > 48"	
65-7513	M	Mill Finish Sanding Aluminum Plate **ALL** Dimensions ≤ 1220mm	—
65-7514	M	Mill Finish Sanding Aluminum Plate **ANY** Dimensions > 1220mm	



80/20 Custom Machining

We specialize in custom machining aluminum; there are no minimum charges and no minimum runs. Contact 80/20 today at 260.248.8030 or www.8020.net for assistance.

DID YOU KNOW?

Every year, 80/20 machines over 100,000 custom parts, panels and aluminum profiles.

Glossary

0 Degree Dynamic Pivot Nub	A connecting block that allows profiles to swing 180 degrees parallel to the mounting profile.
10 Series	80/20's family of T-slot profiles utilizing 1.0 inch and 0.5 inch centerlines.
15 Series	80/20's family of T-slot profiles utilizing 1.5 inch and 0.75 inch centerlines.
20 Series	80/20's family of T-slot profiles utilizing 20mm and 10mm centerlines.
25 Series	80/20's family of T-slot profiles utilizing 25mm and 12.5mm centerlines.
30 Series	80/20's family of T-slot profiles utilizing 30mm and 15mm centerlines.
40 Series	80/20's family of T-slot profiles utilizing 40mm and 20mm centerlines.
45 Series	80/20's family of T-slot profiles utilizing 45mm and 22.5mm centerlines.
45 Degree Support	Precut and assembled profiles with 45° miters that add strength to corner connections.
6005A-T61	An aluminum alloy used in many 80/20 profiles. It offers high strength, excellent machinability, and a great aesthetic finish.
80/20 Builds	The project assembly division of 80/20® LLC. There are three service levels; preloading, subassembly and full assembly.
90 Degree Flat Plate	A connecting plate used to make right angle connections of T-slot profiles.
90 Degree Dynamic Pivot Nub	A connecting block that allows profiles to swing 180 degrees perpendicular to the mounting profile.
ABS Haircell	Acrylonitrile Butadiene Styrene: decorative plastic sheet material.
Access Hole	A hole specifically located in the T-slots that allow access to tighten an end fastener.
Adjustable Hinge	A hinge with adjustable tension between the leaves.
Aesthetic	Tasteful, pleasing, or inventive.
Align-a-Groove	Shallow grooves running the length of some of 80/20®'s T-slotted profiles that aid in aligning profiles during assembly.
Aluminum Composite	Two thin aluminum sheets bonded together with a corrugated polyallomer core.
Aluminum Extrusion	Aluminum bar produced by heating and pressing the aluminum material through a shaped opening in a die, forming a distinctive profile.
Anchor Fastener	A strong and adjustable fastener used to join two T-slotted profiles at right angles.
Anodize	A thin, protective electrochemical coating used on aluminum surfaces; can be clear or colored.
ASTM	The American Society for Testing Materials: organization that sets testing standards and methods for materials.
Attitude	Our positive, can-do disposition that sets 80/20® apart from the rest of the competition.
AutoQuoterX® II	80/20's free 64-bit accessible plugin used in conjunction with full versions of AutoCAD®.
BHSCS	Button Head Socket Cap Screw.
Black Chromate	A black, corrosion-resistant coating used on some ferrous screw products.
Black Zinc	A black, corrosion-resistant coating used on some metal products.
Bolt Assembly	A single part number that makes ordering combinations of fasteners easier and faster.
Bushing	A removable cylindrical lining for an opening used to limit the size of the opening, resist abrasion, or serve as a guide.
Butt Fastener	Connects profiles end-to-end for a strong, flush connection.
CAD	Computer Aided Design or Computer Aided Drafting.
Chamfer	To bevel off the right angled edge of a corner.
Cheater Pipe	An improvised breaker bar made from a length of pipe and a wrench, used to provide extra torque.
Clear Chromate	A clear, corrosion-resistant coating used on some ferrous metal products.
Coefficient of Friction	The amount of force between two materials rubbing against each other.
Counterbore	A cylindrical, flat-bottomed hole drilled partially through a profile.
Countersink	To chamfer a screw hole to allow the screw head to remain level with the mounting surface.
Cross Clamp	A stanchion block used to connect two tubes at right angles.
Cross Flat Plate	A pre-drilled plate used to connect profiles that intersect at right angles.
Deburr	To remove a sharp edge from a machined surface.
Double Flange	A part with two opposing projections, commonly used for attachment to other surfaces.
Double T-Nut	A T-nut containing two threaded holes with centerlines that match those of flat plates, used to speed up assembly.
Drill Jig	A fixture used for drilling perpendicular access holes.

Glossary

Drop Lock	An 80/20 T-slot profile design feature that consists of a 2° decline in the T-slot flange. When a fastener is tightened to or beyond the necessary torque, the flange will press up to the adjoining profile, creating pressure that tightly holds the two bars together.
Dynamic Pivot Nub	An anchoring block fastened to the T-slot allowing mounted profiles full 180-degree motion, perpendicular to or parallel with the T-slot.
End Cap	A black plastic cover for the profile end.
End Fastener	A connecting clip and screw that provides a clean, hidden 90° connection for T-slot profiles.
Ergonomics	An applied science concerned with arranging things people interact with efficiently and safely.
FBHSCS	Flanged Button Head Socket Cap Screw.
FDA	The United States Food and Drug Administration.
FHSCS	Flat Head Socket Cap Screw.
Flange	A rib or rim for strength, for guiding, or for attaching to another object.
Flange Mount Caster	A caster with a pre-drilled flange to mount to a base plate.
Flat Plate	A pre-drilled joining plate or corner bracket used to connect profiles.
Floor Mount Base Plate	A pre-drilled bracket assembly used to anchor an application to the floor.
Friction Hinge	A hinge that holds doors open at variable angles to provide hands-free access for vertical-lifting smaller doors.
Gusset	A supported 45-degree angled bracket used to connect profiles at right angles.
HDPE	High Density Polyethylene.
High Pressure Laminate	A high strength, durable material used for workstations, countertops, and other work surfaces.
Inside Corner Bracket	A pre-drilled angled fastener used to connect profiles at right angles.
Jam Nut	A hex nut used to fix the height position of a threaded leveling foot or caster in the end of a profile.
“L” Structural Pivot Arm	A pre-drilled angled fastener used to connect profiles to pivot nubs.
Leveling/Anchoring Base Plate	A pre-drilled and tapped plate used to mount both leveling feet and floor anchor bolts to a profile frame.
LHSCS	Low Head Socket Cap Screw.
Lift-Off Hinge	An aluminum hinge designed to allow door panels to be removed easily by lifting the door while open. It also utilizes two pin lengths to facilitate fast, easy door replacement.
Linear Bearing	A slide that allows in-line motion using the T-slotted frame as a rail, and UHMW-PE bearing pads as guides. Patented by 80/20®.
Linear Bearing Brake Hole	A precisely located hole that allows for attachment of brake hardware to the bearing housing.
Linear Bearing Brake Kit	The hardware kit consisting of a handle, washer, and T-slot stud used to fix the position of a linear bearing.
Locking Grabber™ Handle	A cabinet latch used for panel doors that locks with a key.
Mesh Retainer	An anchoring bracket that attaches wire cloth or expanded metal panels to a T-slot frame.
Miter Cut	An angled cut.
Mounting Block	Used to attach a hollow or solid round tube profile to a T-slot frame.
MW	Molecular Weight: used in measuring plastic density.
Neoprene	A black, hard rubber product.
Nylatron GS	An extruded plastic used in the manufacturing of 80/20 roller wheels.
Nylon	Any of several polymeric, thermoplastic amides formed into strong elastic thread by forcing a melt through fine jets.
Open Style Access Hole	Customer-specified locations for access holes used to tighten end fasteners.
OSHA	Occupational Safety and Health Administration.
Panel Mount Block	An adjustable mounting block, keyed to the T-slot, used to mount panels to a profile frame.
Panel Retainer	An anchoring bracket that attaches plastic or sheet panels to a T-slot frame.
Pawl	A rotating catch used to capture and hold a door shut.
Phenolic Resin	A decorative, durable surface with exceptional impact and scratch resistance.
Pivot	To turn or oscillate on. To rotate about a stationary point.
Pivot Bracket	A flat plate that allows a profile to pivot 90º or 180º relative to the mounting profile and lock in place.
Polycarbonate	An impact-resistant thermoplastic resin that is hard, tough, and moisture resistant. Trade names Lexan® or Makrolon® polycarbonate
Polyurethane	A tough flexible plastic with high load bearing properties used on some 80/20 casters.

Index

Glossary

Position Floor Lock	A braking device that prevents a frame on wheels from rolling.
Powder Coat	An electrostatically applied paint that provides superior protection.
Preload	To load fasteners onto a flat plate or bracket to speed up assembly.
Pressure Manifold Plate	A pre-drilled plate used with a gasket to form a pressurized air or fluid chamber inside the cavity of a T-slotted profile.
PVC	Polyvinyl Chloride: used in lightweight plastic sheet and snap-on panel gaskets.
Quick Frame®	80/20's economical, lightweight framing alternative, utilizing one-inch square aluminum tubing and nylon push-in corner connectors.
Ready Tube®	Aluminum framing system featuring prefabricated mounting holes.
RGA	Returned Goods Authorization: A number assigned by 80/20's customer service department to allow faster processing of a return shipment.
Dynamic Right Angle Pivot Nub	A connecting block that allows mounted profiles to swing 90 degrees parallel to or perpendicular to the attached T-slot.
Rigid Caster	A wheel that is intended for straight back and forth motion. It can be combined with a swivel caster to provide directional change.
Roller Wheel	A wheel, keyed to fit the 80/20 profile T-slot, allowing 80/20 profiles to be used as rails.
Rust	Oxidation commonly associated with steel products.
SS	Stainless Steel.
SHCS	Socket Head Cap Screw.
Single Flange	A material with one projection, commonly used for attachment to other surfaces.
Slotted Corner Bracket	A fastener used for connecting profiles at right angles. The slotted holes allow for easy adjustments.
Stanchion	A block used for mounting round tubes to a T-slotted frame, adding a fourth or fifth axis of mobility.
Swivel Caster	A wheel that enables pivot turns and instant response to directional change.
Tap	To add threads to an extruded hole in a T-slot profile.
"T" Flat Plate	A pre-drilled plate used to connect profiles that intersect at right angles.
Threaded Stem Swivel Caster	A steerable wheel mounted to a frame by means of a threaded rod.
T-Nut	A special threaded flat screw nut designed to fit into the T-slot of 80/20® profiles.
Transition Bracket	A pre-drilled angled bracket designed to connect different series of profiles.
Transition Plate	A pre-drilled plate designed to connect different series of profiles.
Triple T-Nut	A T-nut with three threaded holes with centerlines that match those of flat plates, used to speed up assembly.
T-Slot Cover	A cover that fits in a T-slot channel to prevent dust and debris build up, cover wires and tubes, and add a polished look.
T-Slot Designation Chart	A diagram to assist in locating machining service points for 80/20® T-slotted profiles.
T-Slot Stud	A threaded bolt designed so that the bolt head fits into the T-slot of a profile, leaving the threaded end protruding.
T-Slot	An opening extruded into, or machined out of, a solid surface in the shape of a "T," designed to capture or hold in place fasteners that can be located anywhere along the surface of the material.
TYP.	Typical.
USDA	United States Department of Agriculture.
UHMW	Ultra High Molecular Weight
UHMW-PE	Ultra High Molecular Weight Polyethylene: excellent abrasion-resistant material used for bearing pads.
Universal Dynamic Pivot Assembly	A connecting block assembly that allows mounted profiles to swing 180 degrees parallel to or perpendicular to the attached T-slot.
Universal Dynamic Pivot Nub	A connecting block that allows mounted profiles to swing 180 degrees parallel to or perpendicular to the attached T-slot.
Wire Duct	A one piece, flexible molded nylon duct for containing wires and tubes. Open slots allow for lead offs; pieces snap together end to end for continuous travel.
Zinc Plating	A bright silver or black corrosion-resistant coating used on some metal products.
